The 16th issue of “Indian Journal of Archaeology (www.ijarch.org)” has eight articles. The first article titled ‘Study and Analysis of Tiran Petroglyphs, Isfahan Province, Iran’ by Masoomeh Taheri Dehkordi & Alamdar Alian gives the details of petroglyphs of Barzgaleh, Ahmad Reza spring and Qomishloo near Tiran, Isfahan Province, Iran. The second article titled ’Paintings of megalithic people near chandragiri fort in tirumala hill region’ by Dr. T. Babji Reddy examines in details the rock painting made with red and white color on the ceiling of a cap-stone type megalith. The third article titled ’Understanding Rakhigarhi and Surroundings: An Archaeology of Hissar District, Haryana’ by Amit Ranjan & Ravindra Nath Singh studies the settlement pattern around Harappan Metropolis Rakhigarhi from Mesolithic times to Painted Greyware period. The fourth article titled ‘Catalogue of Antiquities of State Archaeological Museum, Lucknow, Part- I: Jain (from Kankali Tila, Mathura & other places of Mathura), Baudh (from Mathura) & Gandhar Antiquities’ by Vijay Kumar gives the details of antiquities obtained from Kankali Tila, Mathura, other areas of Mathura city and Gandhar (North Pakistan). The fifth article titled ’Ideas on heroism in medieval south India through epigraphy’ by Chandni Bi examines the development of Hero memorial stones from Sangam age to 17th century A.D. The sixth article titled ’Two Visnu Sculptural Specimens from Dakshin Radha’ by Somreeta Majumdar gives the details of two newly discovered sculptures of Vishnu from Hirapani village and Lakkhnath temple, Narayangarh, West Medinipur, West Bengal. The seventh article titled ‘Some Mughal monuments at Ajmer, Rajasthan: a study in medieval archaeology’ by M. K. Pundhir gives the details of two Mughal monuments namely Akbari Gate of Taragarh, Ajmer city and Jahangir’s pavilion of Pushkar, district Ajmer, Rajasthan. The eighth article titled ’A Unique Wooden Siva Temple in Varanasi: Example of Living Cultural Relations between India and Nepal’ by M.N.P Tiwari & Shanti Swaroop Sinha describes in details the Pashupatinatha temple @ Nepali, Lalita Ghat, Varanasi city district Varanasi U.P. temple built in three storey Pagoda style.

2 BA Archaeology Iranian CHTO Isfahan. Iran

Introduction

Engravings and paintings on cave stones and walls are one of the most common ways of expressing ideas. Humans have used this art since prehistoric times to express their feelings and beliefs. This art is in the modern sense of painting consists of depicting in a symbolic and simple style the animals, human beings and other symbols as a single image, or hunting scenes, events, battles, dances and social events. The study of these motifs in recent years has gradually gained a place in the field of archeological studies of Iran. This art is known by two names: 1- Petroglyph: Any script and motif carved by the human’s hands on the flat surface of stones is called petroglyph. Petroglyphs may be considered the mother of arts, cultures, myths and scripts. 2- Rock art: In its general sense, it refers to all engravings and paintings that have been depicted on the rocks during different periods in various styles and techniques. Although recognizing, studying and analyzing this art in Iran are at an elementary level, it is one of the most important cultural sections. Almost most of the work has been archived based on documents. Although rock motifs have many similarities with each other, the motifs often show hunting scene, battle, and goat monograms, and are technically done by carving and hammering in such a manner that these are created. This consist of hitting the stone on which carving is to be done using a rigid object so that stone is cut to a very shallow depth. The sites which have been investigated by archaeologist in recent years in Isfahan province include Isfahan petroglyphs, Timreh Golpayegan, Howz-Māhy Mubarake, Kuh –e-Donbeh, Ziyadabad and Hasan Rabat.

Geographical Location of meymeh's rock art: Tiran and Karvan city with an area of 1768.8 square kilometers between latitudes 33°1’ and 33°4’ N and longitudes 50°33’ and 51°14’ E, at a distance of 45 km from Isfahan. This city is located in the western part of the province and is bounded on the north and east by the city of Najafabad, on the south by the city of Lenjan and the province of Chaharmahal and Bakhtiari and on the west by the city of Fereidan (Fig. No. 1).
Climatically, the city is divided into two regions: A- Tiran district consists of flat plains and doesn’t have high altitude, with desert and semi-desert climate with hot and dry summers and cold winters. B- Karvan district that starts from the slopes of Dalankuh and Darebid and ends at Tiran plains. The lands of the city and its highlands belong to the Third Geological Age. The south granite intrusive mass of Tiran is part of the Sanandaj-Sirjan structural zone. The general trend of the outcrops of the region including the northwest-southeast intrusive mass is parallel to the Zagros thrust\textsuperscript{12}. The region’s water resources are seasonal and permanent springs and rivers. This region is an ideal environment for a hybrid economy encompassing both farming and animal husbandry.

**Division of the way of creating motifs:** There are three techniques of creating petroglyphs: A- Pictograph: It means applying any color or material to the stone including drawing and painting with charcoal, soot, etc. B- Petroglyph: It means creating changes in the stone including cutting, slitting, abrasion, scraping or crushing. C- Geoglyph: It includes the alteration of the prominence and natural phenomena of the earth by man to show his mental perceptions, whether these are related to art, religion, laws or social and group rituals. The three methods adopted are governed by local geologists. All the petroglyph images were scanned and digitized. According to the studies, the motifs identified in each region were named locally. All the engraved motifs studied were created by the petroglyph method with abrasion and scratching (engraving). All motifs were mostly simple, solid and in some cases linear (Fig. No. 2).
Barzgaleh petroglyphs: This site is located 9 km southwest of Tiran in latitude 32°38’-43.4” N and longitude 51°03’-30.3” E. A series of petroglyphs of the Barzgaleh Strait have been engraved in the corrosion of the Barzgereh Mountains. The rocks are mostly shale and are extremely fragile and dark in color. Surface roughness has not allowed the artist to create large motifs. The natural processes like weathering, salinity, cracking and crystallization of the rocks, and human factors have been effective in accelerating the destruction of the rocks. Petroglyph has been named after the mountain, “Barzgereh”. The local inhabitants called it “Barzgaleh” or “Marzgaleh” because in the old days, despite its proximity to the border of Shahrekord, the traders were passing and the herds were grazing in this area (Fig. No. 3).
Ahmad Reza spring petroglyphs: This petroglyph is located in Ahmad Reza Mountain situated at a distance of 25 km from Tiran in latitude 32°50′00″ and longitude 50°51′00″. Owing to destruction and weathering, the petroglyphs have turned green and gray to black. These have been made by digging and engraving. The rocks are shale (sedimentary) (Fig. No. 4). The petroglyphs has been named after the mountain called “Ahmad Reza”. The motifs include the chamois, ram, ibex (ibex has long and backward-curving horns), gazelle, and two human images. In one case that is possibly a hunting scene, the image of a tree has also been created (Fig. No. 5).
Qomishloo petroglyphs: These petroglyphs are located in Qomishloo plain and in Sanjed region in north and northwest of Tiranz city in latitude 32°48’26.0” and longitude 51°09’39.7”. The rocks of this area are calcareous and dolomitic. The petroglyphs are carved and flat surface that extends westward to the Mouteh hunting area (Fig. No. 6), which have been discovered after surveying almost 200 petroglyphs. These petroglyphs are one of the most important and prominent images in the region and comparable to those of Timre.
Qomishloo’s painters have created motifs in a stylized or unrealistic way. The rocks on which these images carved are scattered over a large area. The engravings in this area include seven human images including A- A standing human with a bow in his hands B- A human hunting with a bow C- A running human carrying an object in his hands. Forty-three animal motifs consisting of 14 goat or ibex, 22 deer with long horns, 7 predatory animals probably foxes, jackals and leopards (Fig. No. 7).
Animal motifs in different modes include A- Animal motif of goat grazing, B- Monogram of an ibex running or standing, C- Image of an animal being hunted and D- Image of an animal with the hunter (Fig. No. 8). Among these motifs, there are three plant motifs. In addition to animal motifs, signs and symbols such as a chess board with animal signs have also been included. The motifs of the Qomishloo petroglyphs are comparable to those of Khoravand and Timre and Golpayegan waterlogged petroglyphs.

![Carved scenes Qomishloo Petroglyphs](image)

**Fig. No. 8: Carved scenes Qomishloo Petroglyphs**

**Characteristics of the motifs of petroglyphs:** The motifs carved on the rocks and steep terraces by hammer and sharpened stone or perhaps metal tools. The depth of the motifs is between 0.5 and 1 cm. Considering the depth and type of creation, the motifs are almost similar therefore it appears that they were created at the same time. By investigating the images thoroughly, it is observed that various animal petroglyphs and goat motif are the most frequent ones.

**Animal motifs:** Ibex, cows, sheep, and chamois are animals, which have always been associated with the traditions and culture of hunters and still live in almost all mountains of Iran and the adjacent highlands. The motif of the horned goat in various postures is one of the most common symbols of the pre-historic period. In Iran, the earliest known image of this animal in the artwork dates back to the early Neolithic period. The earliest identified examples of the motif of a chamois with twisted and simple horns are those of the Burnt city (3rd millennium B.C.) and Sialk civilizations (fifth to first millennium B.C.). In some references, the image of the chamois is as an animal symbol of Gilgamesh, the king of the Sumerian god as well as the animal lord and the symbol of Anahita, the god of rain.
Each race considered the chamois to be one of the most beneficial natural factors. In Lorestan, a chamois is the embodiment of the sun and the angel of rain, in Susa and Elam, the symbol of abundance and the god of germination. In Sumer, the chamois represented the animal character of the Great God. The fact that the goat is an inhabitant of this area, is resistant to heat, moves in difficult mountainous terrain, feeds on lowland vegetation and is a popular game animal of Iran, the vital importance of this animal in the livelihood of the nomadic hunters is obvious. The artist who created these motifs showed the horns more prominently than other parts of the goat’s body. Goat horns are usually curved and semicircular, and sometimes greater than the length of the animal’s body.

Among the series of pottery introduced in phase Sialk III6-5, a motif has been observed that, according to Ghirshman, is probably a dog. In this motif, the animal’s lower back arc at the upward direction is more convex, and it seems that the artist has attempted to depict the animal who is about jump. The motif of the dog is portrayed as a monogram with a body in a profile and stretched state. The animal is drawn in a leaping posture.

**Human motifs:** The human motifs are displayed in monograms, stylized and completely primitive. Their gender is unclear, but in terms of the activities shown, they appear to be males. Most of the artist’s reliance is on human appearance, not details. Engraved human images are of three types: 1- On two feet 2- On horseback 3- Hunting and shooting. Owing to the lack of clarity of the motifs, their condition and the composition no comment can be made. The artist has been able to maintain a realistic balance of body parts & balance and harmony in the picture. These facts demonstrates the kind of relationship between humans and the animal nature around them and their familiarity with how animals are hunted in the environment around them.

**Symbolic motifs:** One of the symbols identified in this region is a circular shape with linear angles attached to it. These signs appear to have been portrayed to inform contemporary people or to inform future generations, and are in fact are the first steps and signs necessary for the emergence of script. Linguists have termed such visual signs derived from the objects to be shown, as the ideogram script. Examples of this symbolic sign have been identified in Timre, Andaryan in Malayer and some other regions.

**Chronographs of petroglyphs:** Dating of rock motifs has been attempted by scholars. A group of scholars conducted the dating based on Iran’s pre-historic, historical, and Islamic periods. Prehistoric scholars compare the created images to examples created on prehistoric pottery, such as the motif of the goat in Susa and Elam. Historical period scholars and Islamic period scholars determine the chronology based on inscriptions of the historical period and images with inscriptions and historical details. The modern techniques are also being used:

1- Pigment sampling (AMS-C14), provided that a number of datable matter exist.
2- For non-pigmented carvings that are carved, depositions over the engravings are used for dating.

Nevertheless, in terms of dating the petroglyphs studied, no archeological material was found near these petroglyphs to aid dating. Since we are not able to analyze motifs through scientific experiments, we have therefore focused on the dating on stylistic ground. For this reason, we set
the baseline for comparative and stylistic study, as well as comparison of images to similar but dated examples. According to the type of scattering of motifs and comparative study to other regions, the hunting scene of the chamois in Yazd (sites of the Arnan Mountain in Mehriz, Bagh Dar in Bafgh, Basin of the Shour River and Hemijan in Bahabad)\(^2\), Tang waterlogged area in Timre\(^3\), Ibrahim Abad in Arak\(^4\) are similar to each other. Additionally, the human image at this site, whether a hunter standing or on horseback, are similar to its neighboring examples in Sangsoon in Qom\(^5\), Farahan in Arak\(^6\), rock motifs in Qazvin\(^7\). Considering the general characteristics of the motifs and those of some other sites, and the fact that the history of these motifs in Iran dates back to at least the Neolithic period (about 6000 BC), as well as the type of motifs on the prehistoric pottery, it is better to consider the fifth millennium to the third millennium BC the date for these motifs (Table 1).

Table No. 1: The motif of similar animals on prehistoric pottery

**Relationship between the study area and the nomads:** Studying the cultures of contemporary societies, which are similar to the pre-historic cultures, can provide valuable information about the pre-historic people. The area could accommodate a large population because it had fertile plains lying between mountains of abundant resources and livestock. The west and northwest of Isfahan have played a crucial role in the lives of the nomads, provided conditions for settlement in this region because of good climatic conditions. Early human life in this region depended on hunting. They followed and hunted the herds moving from place to place. During this time, the early humans created rock images of animals that were vital for their life. Despite the
fading of the nomadic life, some of the regions in highlands are still suitable for grazing. Investigation of the motifs revealed that no means related to agricultural life were identified, and that the motifs created were without special tools. It appears that the main occupation of the painters was hunting, and the hunters have created these motifs on rocks. Although the exact date of these petroglyphs cannot be precisely determined but it appears that they were created in the same age.

Conclusion: According to the motifs studied in this area and other places, the concepts and themes shown in the petroglyphs are general or are influenced by environmental and climatic conditions. For instance, the image of the chamois has been identified at all sites; however, it may be created differently in terms of technique and performance. The images used are divided into three main groups of motifs: geometric, animal and human. Geometric motifs are symbolic and limited, but animal motifs include animals such as chamois, horses, and dogs, and human motifs encompass hunting scenes, which include horse riding hunters. In terms of the type of motifs created, most of the designs represents the expressions of local people, and the scenes are very similar in theme. The motifs were created simply without any decoration by the method of carving and scraping the body of the rock. The semiotics and content analysis of these motifs show that the subject is mostly economic activities that is hunting peculiar to this area.

The study area was in good condition for the establishment and settlement of migratory groups owing to the abundance of springs and water resources. These motifs were created mostly near valleys and foothills, which are a good place for migrants. The scattering of this petroglyph shows that this region has been one of the communication routes for migratory people since the past few thousand years. This region was between Chaharmahal-e-Bakhtiari and west and northwest of Isfahan as one of the migratory routes between Fereidonshahr and Chadegan. Thus, for approximately 5,000 years, this route has been used for economic activities in this area. These motifs indicate that the main occupation of the painters was probably hunting, who attempted to create these motifs while resting or waiting for hunting. The size of the images was small and they were made in different places probably on special occasions and were created in a short span of time.

The petroglyphs discovered in the area of Tiran city of Isfahan belong to the same period according to the technique and style used. Given the motif of the chamois and the existence of hunting scenes, this image is one of the oldest depictions of the chamois when it was still wild. Therefore, we can date these motifs between fifth & third millennium. Although we determined the chronology of the data by comparing them to those of other regions, this case may clarify the cultural landscape of the region. The comparative study of these images is conducted using a scientific method, which shows many similarities to the rock art in other parts of Iran qualitatively and quantitatively. This may be owing to cultural connections and biological and social similarities among the people living in these regions.

Paintings of Megalithic People Near Chandragiri Fort in Tirumala Hill Region

Dr. T. Babji Reddy
Senior Academic Fellow,
Indian Council of Historical Research.

Introduction

Megaliths are the reflection of cultural, religious, mythical traditions and funerary customs of the ancient people. Megalithic tombs were usually erected with a huge dressed or natural slabs and stone blocks; on the surfaces of the rock mounds; outward or inner side of the earth. According to the Archaeologists and Historians in India, these structures were constructed in between 1400 BC and 200 BC for the purpose of disposing their dead and keep the associated things of the dead person. The dead were treated with certain rituals and ceremonies in accordance with the existing beliefs, customs and traditions. Megaliths are related with the genera of the supernatural or transcendental which leads us to the archaeology of religion and cult. The ‘megalithic culture’ is also termed as ‘The Iron Age Cultures’ because the presence and abundance of iron tools in megalithic burials. Megalithism is perceived only as a burial custom which appeared in the age of iron and continued in the subsequent early historic period. Majority of excavation reports suggests that the availability of pottery and potsherds are common in the excavation of megalithic sites.

The local people called these structures in local language as Pandavagullu (Temples of Pandavas) and Rakshasagullu (residences of Giants). According to the oral histories of local people, during the period of Mahabharata, the Pandavas at the time of Vanavasa and Agyatavasa was constructed these structures and they were used as their residences. The ethno-archaeological investigations also reveals that these structures are called as Rakshasagullu because the people believe that in the past giants or monsters erected these structures for their residences.

The study of megalithic cultures in India was started with the publication of Babington’s ‘Description of Pandu coolies of Malabar’ in 1823. In Chittoor district, the study of megalithic cultures was begun by Captain Newbold in 1851. Newbold excavated few cists near Chittoor.
Later several researchers from India and abroad explored more than 200 places and excavated few sites for in-depth study. The early humans expressed their thoughts and emotions through rock paintings regarding several things related to their lives. Rock art is artistic expression of early humans. We will not be able to understand the life of the early humans, but through the study of rock art. We can know the religious, economic and social life of the past by studying these rock paintings. According to the observations of megalithic burials, the people during that period mostly graffitied their artistic expressions on the walls and roofs of these structures. Some of such painted megalithic burials were identified by researchers at Tekumandha (Bangarupalem Mandal), Saidahapeta of Nimmanapalli mandal, Cherlopalli of Gurramkonda mandal Gundalabailu (Yerravari Palem mandal) in Chittoor district.

Against this background, the present paper aims to identify and interpret the meaning of the paintings drawn on the megalithic burial at Mallaiah Palli near Chandragiri fort, at a distance of 18 km from Tirupati in Chittoor district, Andhra Pradesh. This paper also discusses the paintings in the light of ethno-archaeological investigations conducted in the living societies around this rock art site. It also discusses about the archaeological assemblages found around these megalithic burial site.

**Chandragiri Fort**: It is a historical fort under the protection of Archaeological Survey of India located at a distance of 12 km from Tirupati. It was built in 11th century AD under the rule of Yadavas. The Yadava kings ruled the Chandragiri dynasty for about 3 centuries. After 1367 it came into the control of Vijayanagara rulers. It was the 4th capital of Vijayanagara Empire. There are two separate palaces for king and queen namely Rajamahal and Ranimahal located at foothills of Chandragiri. The large and great rampart/fort wall encircles eight temples belongs to Shiva, Vishnu and Hanuman. The great fort wall was constructed using huge stone blocks. The architecture of the palace is an example of Indo-Sarcen architecture. The Golkonda kings occupied this fort in 1646 and subsequently it came under rule of Mysore kings.

**About the site**: It is located at a distance of 4 km southwards from Chandragiri Fort and 1 kilometre eastwards from Mallaiahpalli village (Fig. 1). The megalithic dolmen was erected on a hill named Pandavulabanda in a reserve forest. A large and heavy stone slab was placed over eight pillars. The cap stone measures more or less 3.30 m in East-West and 3.85 m in North-south directions. The pillars arranged in circular form leaving some gap in east side which looks like an entrance. The ceiling consists several painting in red and white pigments (Fig. 2). The megalith was constructed in east-west orientation and the entrance was kept in the eastern side. A few scholars and media reporters had earlier noticed this site but no detailed study was done.
Fig. No. 1: The eight pillared megalith at ‘Pandavula banda’ near Mallaiah Palli

Fig. No. 2: White and red ochre paintings on the inner roof
Identified Graffiti: The paintings in megalithic monument at Mallaiahpalli show several social and religious lives of the past people. Some of the identified symbols are discussed with analogies of the contemporary society. The paintings consists geometric symbols like plus, multiplication signs, star shapes; wheels with spokes; Circles which having dot at the centre; Circles with plus signs; Star shapes; Huge individual dots; Hexagrams (called as Shatkona in Hindu religion) is a spiritual symbol used in tantric practice. The shatkona is also called as seal of Solomon; Rectangles with multiplication signs; Trident (trisulam) shapes are drawn in white colour. These trident symbols are having close similarities with tridents found in the rock art at Onakikondi near Hampi in Karnataka. Some images resembles ‘Thirunamam’. The thirunamam is Hindu religious mark smeared with white and red colours on the forehead. It is the symbol of Lord Venkateswara of Tirumala. Human figures holding spear with two hands and standing on the ground; a man holding sword in standing position; a man riding horse and holding a sword in his hand and using the other hand used to hit the horse on back side to make him move faster. Several pictures show that the men are holding swords or spears with their hands. Some of the red ochre paintings resemblances a group of men standing side by side. In one figure, there is a jar which is decorated with human figures. In some of the images, red and white pigments were used to draw the images (Fig. 3). The outline of some images are drawn with white pigment and the red ochre dots are put on these lines. Different layers of painting are visible here. The old paintings have faded and the later paintings are bright.

Ethno-Archeological and psychosocial interpretations: In the paintings of megalithic monument at Mallaiahpalli near Chandragiri fort were seen several geometric and non-geometric symbols. These geometric symbols have close similarities with magical/tantric symbols which are used as yantras by contemporary traditional witch doctors of the Tirumala region (Fig. 4 & 5).
The contemporary tantric healers draws such symbols (yantras) on copper foils and this folded copper foil is inserted into amulet (talisman) which is tied to the neck, hand or waist of a man to ward off evil or to bring good luck. The tantric healers also engrave similar magical symbols on copper plate and hanged these on walls to bring good luck. Some of the geometric symbols are drawn with both red and white colours. There are circles drawn with red ochre. The similar circles and human figures are also found at another rock art site namely ‘Chalaparakona’ located at a distance of 50 km from this site. The sati stones and the hero stones are also identified nearer to this rock art site.

In this rock art site, some images which depict two persons lying on the ground and holding each other’s legs. There are two images, one drawn in red ochre and other drawn in white pigments (Fig. 6).
The villagers in the surrounding regions use locally found red and white ochre colours for different uses in their household. Every household keeps one pot for white and one pot for red colour. The women collect selected red soil (*yerramatti*) from their surrounding hillocks for the preparation of red pigment. The required quantity of red soil is taken into the pot and is stirred vigorously after adding sufficient water. A piece of cloth is dips in this pot and is used as brush. The white colour is also prepared in the same way. The lime stone pebbles are put into the pot and soaked with water for few days. They apply colour with cloth or brush. The people in the surrounding villages decorate their thresholds on every auspicious day by smearing red and white colours. The temples walls and the religious rocks or boulders bearing red and white stripes are common site in this region.

**Indigenous Board game engravings:** The indigenous board game diagrams are engraved on the floor (Fig. 7 & 8). This type of board game engravings are also observed in several caves and rock shelters in Tirumala hills and its surrounding regions. It reveals that the people in the past played these games during their leisure times for mental relief and recreation. The people in the villages around this rock art site still play these games. These game drawings are observed at many
megalithic burial sites. It indicates that may be either the megalithic people knew about these board games or their descendants later on engraved these at these places.

Fig. No. 7: Engraved drawing of ‘Pulijudham’ or meka-puli aata (tiger-lamb board game)

Fig. No. 8: The engraving of the board game of ‘Daadi’ or navakankari or char-par (nine men’s Morris)

Conclusion: The structure of megalithic monument in Mallaiahpalli is different from the megaliths found in Chittoor district. In these structure, stone pillars have been used to support the roof slab. There are several megalithic burials around this place but none of these have paintings. The geometric symbols in these paintings are similar to tantric symbols used by local witch
doctors. These paintings have close similarities with the paintings found in the surrounding region.

**Acknowledgements:** The author is very thankful to Indian Council of Historical Research (ICHR) for providing financial support to work on rock ark in Tirumala hill region, Andhra Pradesh.

drravindransingh@gmail.com

This is centenary year of the discovery of country’s first urban culture i.e. Harappan Civilization, although it was declared later after a long research which is still underway. This first Civilization is presently expanded in north-western part of the Indian sub-continent. North-Western part of India is Haryana having some major Harappan Sites along Ghaggar River also called Vedic Sarasvati River by scholars having impression of its geography and its traces of palaeo-channel which has higher concentration of Harappan sites in its valley. Kalibanga was the first site excavated on the course of the river in Hanumangarh, Rajasthan. This excavation proved that Harappan Civilization extended much beyond the Indus River and at present Ghaggar River basin is having a more urban centers of the Harappan Civilization than any other river. After this excavation many sites have been excavated vertically and horizontally in the said region of Ghaggar. Mitathal, Banawali, Bhirrana, Kunal, Rakhigarhi, Sothi, Siswal, Nohar, Karanpura, Dabli Vas Chugta etc. have been excavated and reported where as some are still under excavation and research.

Rakhigarhi in Hissar, Haryana is an important site belonging to this civilization and it needs to be understood in very broader aspects. Rakhigarhi was first reported by Prof. Suraj Bhan in 1960s then Pre-Harappan attribute were identified by Dr. Silak Ram. Excavation at this site was carried by Dr. Amrendra Nath1 (Ref- Nath 1999, 2000, 2001, 2014, 2015, 2017). Later on Prof. Vasant Shinde excavated in 2014-162 (Ref- Shinde 2013-14, 2015-16, 2018, 2019). This is also claimed to be largest Harappan site of the continent if the nearby mounds falling in different villages are also added to this.
Methodology for survey

There is a long record of surveys in this area since Suraj Bhan’s survey work. The extensive surveys have been done by several agencies and individuals in the Rakhillagari and its proximity. The first survey on archaeological ground couldn’t be traced yet. A list and compilation of these survey works have been provided by Chakrabarti and Saini in 2009, after this the best available example of survey is the Land, Water and Settlement (A collaboration between Banaras Hindu University and University of Cambridge) project. Under this were conducted Rakhigarhi Hinterland Survey in 2009-10, Ghaggar Hinterland Survey in 2010-11 and Two Rains Survey in 2017-19. These reports have been published and have widely utilized GIS and other system\(^3\) (Ref- Singh et al. 2009, 2010, 2011, 2018, and 2019).

Hissar, Fatehabad and Sirsa were one district with name Hissar earlier but now they are three districts in Haryana. Fatehabad and Hissar are important from the point of view of Harappan Culture and Civilization, basically they are part of Eastern territory of the Harappans. In Sirsa No Harappan Site has yet been confirmed. Although the cultural sequence of the region begins from Mesolithic to Modern times.
**Technique and Approach:** Authors have conducted survey of the lesser visited part and tried to understand the archaeology of the region in comprehensive manner. In this work, village to village survey approach and digital documentation has been tried. Google maps and Google earth imagery has been utilized to understand the region before moving to the field. Fixed parameters have been used to record the field data. These are Name/Region, Geo-coordinates, Length/Width/Height/Shape and orientation of the archaeological site, Nature of preservation, closest village/water source, nearby sites and distance, personal observation and specificity of the site including a rough sketch map having site location w.r.t. Village, Pathways, permanent markers on site and rough shape of the site. GPS GARMIN etrex was used to take the geo-coordinates. In Some cases Google earth Images were also taken at site for comparative study for the assessment of damage and status of site. A systematic plotting of the archaeological location has been done on printed maps and on digital maps on hand held GPS and Mobile in field.

The archaeological site was defined in the following manner. There should at least be 5 diagnostic potsherds or artifacts spread in 100 sq. Meter area so that it can be called an archaeological site. Site preservation status is assessed with the three major categories, High, Medium and Low. These categories are based on height of mound, landscape and surface observation. A high preserved site is that which has no disturbance on surface and whose shape and orientation is clearly recognized. Low preserved site is site with lots of disturbance on surface and orientation and shape are very confusing. Sometimes recently flattened sites give different status. Threat level is also assessed for the three broad categories. This is also explained as High, Medium and Low. High threat sites are the site which are being damaged or earth is about to be removed or permanently disturbed. Its condition in future can also be accessed through talk with owners or authorities. Medium threat can be assigned to the site which is leveled or disturbed to some extant but not much and in near future the site will not be disturbed. Low threat can be assigned to the sites which are not occupied by permanent structure and no chances of removal of earth from the mound in near future. But this is the guideline for the assessment of threat and state of preservation.

Since the region has other important excavated sites viz. Masudpur, Lohari Ragho, Khanak, etc., the possible comparative study is necessary before analyzing the material remains recovered from various sites.

**List of Archaeological Sites in Hissar (Self Explored)**

25 sites of this survey are new to add the available survey list. 20 Medieval sites, 10 Historical sites, 1 PGW sites, 4 Late Harappan, 1 MH, 1 EH sites are new addition in chronology. 9 sites are Historical, Medieval. 4 Late Harappan and Medieval sites, Late Harappa and historical are 1, 1 site is having Early Harappan, Mature Harappan and PGW sequence. Maximum number of sites added is of medieval period. There is a basic reason behind this. Single cultural sites of medieval period were not reported in earlier works.

Brief Description of Archaeological Sites:

1. **Ajitpura**: Geo-Coordinates 29°04′00″ N 76°05′50″ E. Elevation 712 Feet. This site is a camp site close to village Sisar and is around 0.25 Ha in size, oriented North-South and its level with surrounding area. Pumping station is installed on the site. A canal passes through site. There is no visible structural remains. The ceramic industry found is of medieval times. The site is poorly preserved and under high threat from leveling for ease in irrigation. (Plate I)

Fig. No. 2: Google Earth Image of the site visited during the survey work
2. **Badala-I**: Geo-Coordinates 29°07′14″N and 76°09′29″E. Elevation 672 Feet. The village Badala is located at a distance of about 20 Km north-east of Hansi town. A small road from Jind-Bhiwani road leads to the village. There are two archeological sites within the revenue jurisdiction of the village.

   The site Badala I is located about 1.5Km East of the village. This site measures approximately 2.5 Ha and its level with surrounding area. This site is locally known as *Kheri*. The ceramic industries found are of Late Harappan and Historical. This site is medium preserved and under high threat.

3. **Badala-II**: Geo-Coordinates 29°06′19″N and 76°09′52″E; Elevation 670 Feet. The site lies about 2 Km south-east of the village and Bass-Bhataul approach road passes throw the southern part of the site. This site is spread over an area of about 8 Ha. Except the southern part the whole area of the site is under cultivation. The brick kiln is destroying the site. The ceramic Industries found are of Late Harappan and Medieval period. Faience bangle and Terracotta areca nut shaped beads were collected from the site during the explorations. It is well preserved and under medium threat.

4. **Bhatala I**: Geo-Coordinates 29°10′58″ N and 75°55′38″ E; Elevation- 698 ft. The village is 8 Km North of Hansi on Barwala road. The mound with respect to village is in south at a distance of almost 2 Km. Height of the mound is 1 meter and its area is 1.5 Ha. Pot sherds and faience chips were collected from the mound. The ceramic industries found is Medieval and Late Harappan4 (Ref- IAR 1980-81).

5. **Bhatala II**: Geo-Coordinates 29°10′15″ N and 75°54′17E; Elevation- 720 ft. The mound lies south-west of village at a distance of 500 m. Mound is having height of about 6 m. Ceramic
industries found are Late Harappan and medieval period. The site covers only 2 Ha of 100 Ha dune. Sand dune is oriented in North-West, South-East direction. The mound is well preserved and threat is low.

6. **Bhatol-Rangran**: Geo-Coordinates 29°06’30”N and 76°05’53”E. The village is located at about 15 Km north east of Hansi Road. A road from National Highway No. 10, near village Shorkhi leads to the village. There is an archeological site about 200 meter north of the village. This site falls under the barren land. The land is under the jurisdiction of the Panchayat of village. This site measures about 4 Ha and is about 1 meter high from the surrounding ground level. This site yielded remains of Late Harappan, PGW and Medieval period. The state of preservation of site is low and threat to it is high (Plate II)

![Plate II: Bhatol: Site under Plough, Tiny Bits Are In Soil](image)

7. **Chamar Khera**: Geo-Coordinates 29°30’42” N and 75°47’54”E. This is a small mound of 2 Ha. Some parts in west are 1.5 meter high. A *majar* is located on the site. The site is under cultivation. The ceramic industries found are of early historical and medieval period. The site is moderately preserved and there is medium threat to it (Plate III)
8. **Chandu Kheri**: Geo-Coordinates E. 75°59'25" N 29°24'24" Elevation 679 feet. The site lies on Kharkhara – Mathloda road. The site is level ground with 2 Ha area oriented in North-South direction. Southern portion of the site is 0.4 m high. Main mound and maximum part of the site has been removed. The ceramic industry found is of medieval period. Its state of preservation is low and threat is high (Plate IV, XL).
9. **Chitain I**: Geo-Coordinates 29°33′31″ N 75°54′44″ E; Elevation 709 Feet. There are two mounds in the village. It has an area of 15 Ha. Central part of mound is 8-9 m high. A part of mound is occupied. The glass bangles, beads of agate, pieces of agate and quartz materials are found on the mound. The structural remains are found on the mound. The ceramic industries found are of early historical and medieval period. The state of preservation is high and threat is also high (Plate V).
10. **Chitain II**: Geo-Coordinates 29°33’59” N 75°54’42” E  Elevation 689 Feet. The area of the mound is 2 Ha. The mound has two fired brick walls and a modern well (Plate VI)

![Plate VI: Chitain II: Well Of Historical/Medieval Times Appeared In Soil Removal, Mark the Section Behind Well](image)

11. **Data I**: Geo-Coordinates 29°13’19” N 76°01’13” E, Elevation- 718 feet. This site is situated at a distance of 3 km from Masudpur on the left side of Sisai road towards Shaladheri village. Locally this site is identified as Gaushala. The area of the mound is 3 Ha and the height is 1 m. The village is located on the mound. Many house structures have been built from lakhori bricks. There is a small pond in the village and a well dated 1850 AD3 (Ref- IAR 1980-81, Ajay Kumar 2001, Singh et. al 2010)

12. **Data II**: Geo-Coordinates 29°13’46” N 76°00’31” E, Elevation- 710 feet. This site located 2.50 km from Data Goshala on kachha way. This mound is situated on Data to Sisai road around 6 km from the Data village. Area of the rectangular mound is 4 Ha and its height is 1 m. The ceramic industry is Harappan. This is also called Masudpur X in RHS survey6 (Ref- Singh et al. 2010)

13. **Data III**: Geo-Coordinates 29°14’16” N 76°00’28” E, Elevation- 724 feet. This is a small mound less than 1 Ha called Tharukhera. This mound is flat with few pot sherds. This is a historical site with poor preservation and high threat. This is also called Masudpur IX in RHS survey7 (Ref- Singh et al. 2010).

14. **Data IV**: Geo-Coordinates 29°13’42” N 76°00’43” E; Elevation- 714 feet. This mound is 3 km from Data village. This is a big mound of 8-9 Ha, moderately preserved with high threat. The ceramic industries found are Early, Mature and Late Harappan8 (Ref- Singh et al. 2010)
15. Data V: Geo-Coordinates 29°14’ 29” N 76°014’ 28” E; Elevation- 716. Area of the mound is 4 Ha and height is 2 m. Site is in 5 km south of village. The ceramic industries found are Mature Harappan & Historical period (Ref- Singh et al. 2010)

16. Dhanderi I: Geo-Coordinates 29° 04’ 04” N and 75° 53’23” E, Elevation 713 feet. This is on Sultanpur-Dhanderi village. The site lies to the north-east side of the village. Area of the mound is 1 Ha and height is 1 m. The ceramic industry found is of medieval period (Plate VII)

![Plate VII: Dandheri: Flattened Site under Honey Farm](image)

17. Dhanderi II: Geo-Coordinates 29° 04’ 20” N and 75° 54’21”E. Elevation- 702 feet. The mound is called Mammanpura. The site is almost destroyed. It was earlier reported in IAR 1980-81. The early historical bricks have been reported from this site. The state of preservation is low and threat is high (Plate XLI)
18. **Dandheri III (Chandupitra temple):** Geo-Coordinates 29º03’23”N 75º54’21” E; Elevation 706 Feet. Area of the mound is 1 Ha and height is 2m. It lies to the east of the road going to Puthi village having a modern memorial temple of local hero Mangal Khan. The ceramic industry found is of medieval period (Plate VIII)

19. **Daulatpur Khera:** Geo-Coordinates 29º27’21” N. 76º01’02” E, Elevation- 737 feet. The mound lies to the west of village Daulatpur near the road going to Litani. Mound is divided by kachha cart track. The area of the mound is 6 Ha and its height is 2 m. The mound has been cut to make a circular water tank
of 75 m diameter. Find of the antiquities is scanty. The ceramic industries found are of early historical and medieval period. Site is well preserved and under medium threat. (Plate X, XLII)

Plate X: Daulatpur: View From Road Side, Observe the Expose Section And Height

Plate XLII: Ceramics from Daulatpur

20. Depal Khera: Geo-Coordinates29°04’21”N 75°54’01”E; Elevation- 709 Feet. The mound is near secondary school. The area is 3 Ha, height is 3 m and its orientation is along East-West axis. The site has been disturbed for agriculture. When we visited jute is being grown in the field. It is used for cultivation. The ceramic industry found is of Early Medieval period. (Plate IX)
21. **Gamra I**: Geo-Coordinates 29° 16’ 49” N and 76° 5’ 24” E, Elevation-710 ft. The village is located at a distance of about 10 kms north-west of Narnaund. There are three ancient sites falling in the jurisdiction of the village. The site-I is situated about 1 km. The area of the mound is 3.5 Ha. The site is partially under cultivation. The ceramic industries found are of pre Harappan, Harappan, late Harappan and early historic times.

22. **Gamra II**: Geo-Coordinates 29° 17’ 09” N and 76° 4’ 59” E, Elevation-713ft. The mound is located about 3 km west of the village on kuchcha track which go to Lohari Ragho. The mound known as ardhi or khera. Its area is 1 Ha and height is 0.5 m. The mound is partly under cultivation. The ceramic industries found are of Harappan and late Harappan. The site has yielded the pot-scherds of storage jars, basins, vases, bowls, bangles of TC & faience and fired cakes.

23. **Gamra III**: Geo-Coordinates 29° 17’ 30” N and 76° 5’ 59” E, Elevation-716 ft. The mound is located 0.8 km to the north-east to the village. Locally the site is known as bani. The area of mound is 1 Ha. At present kairand kiker trees can be seen in large number on it. The site has yielded the pot-scherds of storage jars, vases, bowls, basins etc. of early historic and medieval times[10] (Ref- Kumar 2009). Earlier PGW was reported on the site.

24. **GopalkiDhani**: Geo-Coordinates 29°31.57’N and 75°47.10’E. Elevation- 710 feet. The mound is covered with horny shrubs. It is of medieval period (Plate XI)
25. **Hansawala**: Geo-Coordinates 29°31'57"N and 75°53'02"E. Elevation- 715 feet. The site is situated on the road to Madanpura. The area of the mound is 9 Ha. Some parts of it are 1 m high. The state of preservation is low and threat is low. The ceramic industries found are of early historical and medieval period (Plate XII)
26. **Jakhod khera-I**: Geo-Coordinates 29°12′27″ N and 75°33′47″ E; Elevation-690 feet. The village is situated about 21 Km west of Hissar on Hissar-Adampur road. The site is located about 500 m south of the village. The mound is under cultivation. The area of mound is 2.5 Ha and its height is 2 m. The ceramic industry found is of medieval period. The state of preservation is medium and the threat is also medium (Plate XIII).

![Plate XIII: Jakhod Khera I: Site And Exposed Section, Mark Earth Removal, East Side](image)

27. **Jakhod khera-II**: Geo-Coordinates 29°12′54″ N and 75°33′38″ E. Elevation-693 feet. The site is located about 1 Km west of the village in Gram ShamlatZameen. The area of Theh mound is 6 Ha and its height is 3 m. Early historical pottery is found from the mound.

28. **Jeet Pura**: Geo-Coordinates 29°11′25″N and 76°04′40″E. The village Jeet Pura is situated at a distance of 10 Km to the north east of Hansi town. Western part of the site falls in the village Garhi. Northern part of the site falls in the village Kharkhara and the eastern part of the site falls in the village JeetPura. The site is located at about 1 Km west of the village. The site is locally known as Kheri. The area of the mound is 2.5 Ha. The mound is under cultivation. The ceramic industries found are of Early Harappan, Mature Harappan and late Harappan period. Besides pottery the antiquities found from the site are triangular and circular t.c. cakes, wheels, beads, balls, pieces of faience bangles, stone balls, pestles, etc. This is poorly preserved site with high threat level.

29. **Kajal**: Geo-Coordinates 29°12′00″ N 76°03′00″ E, Elevation- 702 feet. The village Kajal is located about 16 kms north-east of Hansi. The mound is called Kajal khera or Dobi khera. It is partly inhabited and partly under cultivation. The area of the mound is 4 Ha and its height is 2 m. The
ceramics industries found are of late Harappan and early medieval period. The state of preservation is medium and threat is high.

30. KhairiTheh I: Geo-Coordinates 29°29'08" N 75°46'12"E; Elevation 718 Feet. The area of the rectangular mound is 10 Ha and height is 3m. The ceramic industry found is of medieval period. The site is under high threat (Plate XIV)

Plate XIV: KhairI: Site from North Side, Mark the vertical Exposed Section And Soil Removal

31. KhairiTheh II: Geo-Coordinates 29°28 '6"N 75°47'17"E. Elevation 730 Feet. The site lies 1.8 KM South-East of Khairi Village. The area of the rectangular mound is 15 Ha and its height is 3 m. Brick walls are found on the mound. The ceramic industries found are of early historical and medieval Period. The state of preservation is good and threat is medium (Plate XV)
32. Kharkhara: Geo-Coordinates 29°12’ 00” N and 75°52’ 30” E. The village is situated about 19 Km north-east of Hisar on Hisar-Chanot link road. There is an ancient site about 3 Km north-east of the village. The mound is known as Tiba. The mound is under cultivation. The area of the mound is 4.75 Ha and its height is 10 m. The ceramic industries found are of early historical and medieval Period. The state of preservation is good and threat is low (Plate XVI).

33. KharakPunia Khera: Geo-Coordinates 29°21’16”N 76°00’ 16” E. Elevation 730 Feet. The area of the mound is 8-9 Ha and its height is 0.1 m. The ceramic industry found is of late Harappan period. The state of preservation is low and threat is high (Plate XVII).
34. **Khedar I**: Geo-Coordinates 29°22′22″N 75°53′00″E; Elevation 788 Feet. The mound lies 2 KM from the main road. The area of the mound is 3 Ha and height is 1.5 m. A modern irrigation canal passes through side of the side. The ceramic industries found are of Early Harappan, mature Harappan and PGW period. The state of preservation is low (Plate XVIII, XIX, XLIII, XLIV)

Plate XVIII: Khedar : East View, Observe the Elevated Mound
Plate XIX: Khedar: View From Top to South Side

Plate XLIII: Ceramics from Khedar I
35. **KheriGangan**: Geo-Coordinates 29°08’38’’N 76°02’12’’E. Elevation 714 Feet. The mound lies 1 Km to the East from Village. The area of the mound is 3.5 Ha and its height is 1m. The mound is under cultivation. The ceramic industry found is of late medieval Period. The state of preservation is low and threat is high (Plate XX)

36. **Lohari Ragho II**: This site has been destroyed. (Ref- Singh et al. 2015) (Ref- Garge 2005).
37. **Lohari Ragho III**: Geo-Coordinates 29° 15’ 30” N and 76° 3’ 37” E Elevation -711 ft. The mound is at a distance of 3 Kms from the village. The rectangular site has an area of 10 Ha and east-west orientation. The mound is under cultivation. Scattered potsherds must have been disturbing to crop yield. A large number of potsherds and stone objects were kept aside to make band on field. The ceramic industries found are of early historic, Early Harappan, Mature Harappan and late Harappan. The state of preservation of the mound is good and threat is high (XXI)

Plate XXI: Lohari Ragho III, Mark the Exposed Section, South-East View

38. **Majra I**: Geo-Coordinates 29°11’22” N 76°07’21” E, Elevation- 716 feet. The Village is located at a distance of 5 kms. The site I is situated about 1 km to the south to the village. The mound is known as Ujadna khera. The area of the mound is 1.5 Ha and height is 0.5 m. The mound is under cultivation. The ceramic industries found are of early historical and medieval period. It has yielded the pot-sherd of storage jars, vases, bowls, lids etc. of early historical and medieval period. Some antiquities also collected from the piece of terracotta bangles, beads etc. The state of preservation of the mound is low and threat is high (Plate XLV)
39. Majra II: Geo-Coordinates 29°11'5" N. 76°06" 27' E, Elevation- 716 feet. The mound locally known as Kabristan is situated about 1.5 kms west of the village. The area of the mound is 1 Ha. It is under cultivation. The ceramic industry found are of late Harappan period and Painted Grey Ware. Pot-sherds of storage jars, vases, part of Handi and faience bangle were collected from the site. The state of preservation is low and threat is high (Plate XLVI).

40. Masudpur II: Geo-Coordinates 29°14'34" N. 75°59'00" E, Elevation- 715 feet. The site Masudpur II is assigned by RHS 2010³³ (Ref- Singh et al. 2010) is located about 3 kms to the north of the village. The mound is known as Sunarawala khera and is under cultivation. The area of the mound is 1.8 Ha. The
ceramic industry found is of late Harappan period. The antiquities found from the site are circular t.c. cakes, a faience ball and bangle pieces.

41. Masudpur III: Geo-Coordinates 29°13′50″ N. 75°59′08″ E, Elevation- 708 feet. The mound is located about one km to the east of the village. The mound is under cultivation and known as Mamanwala khera. Its area is 1.7 Ha. The ceramic industries found are of early Harappan and late Harappan period. The triangular and circular t.c. cakes are the antiquities collected from the site during the course of explorations14 (Ref- Singh et al. 2010).

42. Masudpur IV: Geo-Coordinates 29°14′13″ N. 75°58′52″ E, Elevation- 711 feet. The mound is situated about two kms to the north of the village known as Sadhana khera. The area of the mound is 1 Ha. The ceramic industry found is late Harappan. The antiquities found from the site include triangular & circular t.c. cakes, wheel and pieces of faience and terracotta bangle (Plate XXII).

Plate XXII: Masudpur VII, Exposed Section in Left Mound

43. Mehnda: Geo-Coordinates 29°02′50″ N 76°03′50″ E Elevation 709 Feet. The mound lies on North-South axis and is partly inhabited and has an area of about 1 Ha. Its height varies from 3 m to 1 m from east to west. There is a temple on the mound. Some metal objects was recovered while in construction of the temple which was later submitted to local administration. The ceramic industry found is of late medieval period (XXXIII).
44. **Moth-Rangaran**: Geo-Coordinates 29°14’ 1” N 76°05’ 38” E. Elevation- 716 feet. The village is located at a distance of about 4 kms west of Narnaund. The mound known as *khera* lies 1.5 kms east of the Village. The area of the mound is 1.6 Ha and is under cultivation. The ceramic industries found are of early historical and medieval period. Sandeep found potsherds of vases, bowls and three *Yaudheya* coins from the site15 (Ref- Sandeep 2005).

45. **MundhalKhurd**: Geo-Coordinates 29°00’51” N 76°11’18” E; Elevation 718 Feet. The area of the mound is 6 Ha and it lies along North-South axis. Few worn-out pot sherds were collected. The ceramic industries found are of Late Harappan, medieval and modern period. Local residents informed that there was a mound which has been dug out a few decades back. The state of preservation is low and threat is high (XXIV).
46. **Nachar**: Geo-Coordinates 29°27′55″N76°02′02″E; Elevation 662 Feet. Durjanpur is in Jind district and Nachar is in Hissar District. The area of the rectangular mound is 20 Ha and the height is 8 m. The ceramic industry found is PGW. An image of 9th-10th CE is kept in the temple situated on the mound. Prof. D.K. Chakrabarti found antiquities of late Harappan, PGW and Historical period here (Ref-Chakrabarti and Saini 2009). (XXV, XXVI)

Plate XXV: Nachar: Site View From East Side, Mark Elevating Mound

Plate XXVI: Nachar: Exposed Section with Brick Bats, West Side
47. **Partan**: Geo-Coordinates 29°33′59″ N, 75°50′42″ E, Elevation- 749 feet. The area of the mound is 3 Ha and height is 10 feet. The ceramic industries found are of historical and medieval period. It is well preserved on the western side and almost destroyed in the east (Plate XXVII)

![Plate XXVII: Partan: Temple on Site, East View](image)

48. **Puthi**: Geo-Coordinates 29°04′25″N and 76°16′20″E. Elevation- 710 feet. The village Puthi is located at about 35 Km north east of Hansi town. The site is located at about 3 Km east of the village on the sand dunes. Its area is 8 Ha and height is 4 m. It is under cultivation. The ceramic industries found are of Early Historic, Historical and Medieval times. A good numbers of complete Kushana bowls were recovered from the site. (Plate XXVIII)

![Plate XXVIII: Puthi: Mound and Site Under Field, East Side](image)
49. **PuthiMangal Khan**: Geo-Coordinates 29°02'17"N and 75°56'15"E. Elevation- 710 feet. The mound is inhabited. A small temple and ashram is being constructed in the village. The area of the mound is 1 Ha and height is 1.5 m. The ceramic industries found are of historical and medieval Period. The state of preservation is low and threat is high (Plate XXIX)

![Plate XXIX: PuthiMangal Khan: Site In Ploughed Field, Mark the Elevated area Which Is Left In Tracks Only](image)

50. **Rohnat**: Geo-Coordinates E. 75°54'39" N 29°00'03" Elevation 706 Feet. The area of the mound is 6 Ha and height is 0.5 m. The ceramic industry found is of medieval Period. The state of preservation is poor and threat is high. (Plate XXX)

![Plate XXX: Rohnat: Flattened Site with A Small Pile Left](image)
51. SahuTheh: Geo-Coordinates E. 75°50’24” N 29°28’42” Elevation 685 Feet. The area of the mound is 10 Ha and height is 3m. The brick structures are exposed on the mound and on the sites of the mound. The ceramic industries found are of early historical medieval Period. The state of preservation of the mound is good and threat is high (Plate XXXI, XLVII)
52. Sarhera I: Geo-Coordinates 29°22’23” N 75°58’33”E. Elevation 728 Feet. The area of the rectangular mound is 1.2 Ha and height is 2 m. The ceramic industries found are Early and Mature Harappan. (Plate XXXII, XLVIII)

Plate XXXII: Sarhera I: Site under Use, View from Opposite of Main Settlement Of Village

53. Sarhera II: Geo-Coordinates 29°23’29” N 75°57’50”E. Elevation 720 Feet. The area of the mound is 4.5 Ha and height is 1.5 m. The ceramic industries found are of Early and mature Harappan period (Plate XXXIII)

Plate XLVIII: Ceramics from Sarhera I
Plate XXXIII: Sarhera II: Mark the Elevation of Mound And Flattened Site, South East View

54. **Sarhera III**: Geo-Coordinates 29°23’39’’ N 75°58’00’’E. Elevation 720 Feet. The mound is located 300 m east of the Sarhera I. Presently the mound has been destroyed. In earlier explorations, Mature Harappan ceramic industries were reported\(^{17}\) (Ref- Singh et al. 2010) (Plate XXXIV)

Plate XXXIV: Sarhera III: Site from North Side, Mark the Elevation from Nearby Field

55. **SinghwaKhas- I**: Geo-Coordinates 20°59’50’’N and 76°13’55’’E. The mound is located at a distance of 1 Km south of the village. Its area is 1.25 Ha and the mound is under cultivation. The ceramic industries found are of Early Harappan, Late Harappan and Medieval period\(^{18}\) (Ref- IAR 1966-67:17). (Plate XXXV)
Plate XXXV: SinghwaKhas: Ploughed Field Mark Elevation With Nearby Field

56. SinghwaKhas-II: Geo-Coordinates 29°01'08" N and 76°14'44" E, Elevation-723 feet. The mound is located at about 1 Km east of the village. This area of mound is 4.5 Ha and height is 3 m. The ceramic industries found are of Late Harappan and historical period.

57. Siswal: Geo-Coordinates 29°12'39" N and 75°30'40" E. This is a famous excavated site in Haryana and Prof. Suraj Bhan excavated this in previous century. The ceramic industries found are of early Harappan and mature Harappan period (XXXVI).

Plate XXXVI: Siswal: Pole of Soil Removal, Mark The Ash Layer
58. **Siswala**: Geo-Coordinates 29°06’12” N and 75°33’19”. The mound is located about 500 m north-east of the village known as *Panchayati Theh*. It is under cultivation. The area of the mound is 5 Ha and height is 3 m. The ceramic industry found is Early Medieval period. The state of preservation of mound is low and threat is high. (XXXVII)

![Plate XXXVII: Siswala: Mound And Dry Pond](image)

59. **Uklanamandi - Mughalpura – PanchgramiTheh**: Geo-Coordinates 29°31’01” N 75°52’05” E

Elevation 770 Feet. The area of the rectangular mound is 30 Ha and height is 15 m. The ceramic industries found are of Historical and medieval period (XXXVIII, XXXIX).

![Plate XXXVIII: Uklanamandi- PanchgramiTheh: South View](image)

Rakhigarhi: - (Red Box Symbol are excavated Sites, Pink Circle is Early Harappan, Blue Triangles are Mature Harappan, Yellow Star are Late Harappans, Orange Small Square are PGW, Divided Blue Circle are Historical and White Hexagon are Medieval).

Fig. No. 3: Google Earth Image of the Concentration of Site and its pattern
Discussion and Results: To interpret the data obtained from the survey, the data from earlier surveys was taken into account and analysis was done. This data adds to the available work of Chakrabarti and Saini (Chakrabarti and Saini 2009), Kumar (Ref- Kumar 2009), RHS 2010 (Ref- Singh et al. 2010), Nath (Ref- Nath and Garge 2014) and TRS (Ref- Singh et al. 2018). The data from this area and whole of Northwest India suggest very interesting chronology. The first settlers of the region were Mesolithic cultural people (Ref- Nath 2017). The palaeo-channels and dune study suggest the heavy fluvial deposition in 8000 to 5000 years BP and weakening of fluvial process after 3000 BP (Ref- Durcan et al. 2017). The monsoon weakened 4200 Yrs. ago in this area (Ref- Dixit et al. 2014). This decreased the availability of water and subsequent reduction in crop yield and trade. There has been some debate over the age of dunes, but this has not yet been established. Irrespective of their date, these dunes are likely to have been an important geographical factor in the settlement and subsistence strategies used by proto-historic occupants of these plains. This gives information about the climatic and environmental conditions under which the Indus centers developed, flourished and declined.

The Early Harappan centers were scattered perhaps searching the suitable places and transforming into urbanism. The excavation results at sites in northwest India depicts it. Present survey results agree with the previous works that there is shift of the settlements towards north and east of Rakhigarhi (Ref- Singh et al 2010, 2018). Since western part is more arid with dunes the settlement was not easy in this area and was avoided. In late Harappan times, there are smaller scattered settlements which increased in Early Historical times in the form of big mounds. Bigger mounds and dense settlement with new cities grew during medieval period.

The variation in site numbers suggests that the Mature Harappan period saw a centralization of the local Early Harappan population, which then dispersed again during the Late Harappan period, which is a pattern that might be predicted for periods of urbanization and de-urbanization. The survey has also shown that there is considerable change in the location and concentration of sites over time. Many of the sites appear to be distributed in linear alignments, particularly during the Early, Mature and Late Harappan periods, and also to some extent during the PGW and NBPW phases.

Taking Northwest India as a whole it is found that the comparative ratio of the size of the sites in different period suggest that the biggest site was Rakhigarhi having more than 550 Ha and smaller settlements which are large in number have a size below half hectare. The maximum number of sites are around 2-4 ha. These small sites are small village. In Haryana and Punjab it is observed that the villagers make houses in fields and as the population increases around these outlined houses, a new village develops. The small sites of every period are probably hamlets and clusters of houses. Essentially they are close to a big settlements. This practice continuous in the present times.
Considering the Earliest dates and materials in region the chronology begins from Mesolithic at Rakhigarhi, Neolithic at Rakhigarhi and Bhirrana, Early Harappan at Siswal, Banawali, Rakhigarhi, Bhirrana, Kunal, Lohari Ragho II, Khanak, Burj, Masudpur I and VII. These sites show gradual evolution of the material culture too.

Mature Harappan phase is present at almost every site. Some sites show intermingling of material of different phases viz. Bhirrana and Khanak have Early and Mature Phase. Banawali, Rakhigarhi, Bhirrana, Masudpur I and VII, Lohari Ragho II, have yielded material of Mature or Urban Phase. Interestingly Rakhigarhi doesn’t have Late Harappan deposit from excavations. Whereas Lohari Ragho in close proximity of Rakhigarhi has a Late Harappan deposit. Late Harappan Sites are away from main Mounds or Mature Sites of large size.

The PGW settlements spring up immediately after Late Harappans and are close to Ghaggar river. No overlap has been identified in any of the excavation in the study area. The settlement of PGW are higher in Fatehabad particularly in Kunal- Bhirrana- Burj section where they are very few around Rakhigarhi28 (Ref- Singh et al. 2010).

Many of the unprotected Harappan period sites in Haryana have been destroyed by villagers. The authors visited some sites like Masudpur, Lohari Ragho, UklanamandiTheh, Khedar, Kharkhara, Kharak, Sahu etc. several times. These are rapidly being levelled for agriculture and making houses. This will destroy, the cultural heritage of the nation. Some sites have completely faded out with in a decades for ex. Lohari Ragho III, Khedar III, Sarhera II etc. The cause of this destruction is making of roads. An integrated development plan for the ancient mounds can save our cultural heritage.

Introduction

The archaeological section of State Museum, Lucknow houses a very large collection of antiquities from different parts, most of Uttar Pradesh and India. Most important is the collection from Kankali Tila district Mathura U.P. It is the single most collection from one site in whole of India which gives a clear picture of the development of Jain art and architecture from 1st B.C. to 7th century A.D. Besides this, there is a huge collection of terracotta and copper hoard objects. Author studied the archaeological antiquities of the museum between 16th August 2019 and 20th March 2020. The purpose of the study was to make available the photographs and description of all the antiquities kept in the reserve collection and on display, to the academic world.

Author is greatly indebted to the kind and generous support of Shri. Anand Kumar Singh, Director U.P. Museum Directorate and State Museum Lucknow, who opened the reserve collection of the museum for me and gave special instructions to the officers and staff to extend their full cooperation. Mr. C. M. Verma, Assistant Director Technical is living encyclopedia of the museum and helped me greatly whenever there was need. Mrs. Al Shaz Fatmi, Assistant Director Natural History helped me in making bibliography. Mrs. Renu Dubey, Assistant Director Archaeology took great pains in opening the reserve collection during the working hours and remained present in dusty, stale, humid and unhygienic environment prevailing in the basement of the museum along with her colleagues Mrs. Shalini, Custodian of antiquities and Mrs. Manojini Devi, Publication Assistant.
History of the Museum: In 1863, Colonel Abbott, then Commissioner Lucknow conceived the idea of establishing a repository with the initial aim of collecting the specimens of art and manufactures of Awadh and also the items related to habits, custom and mythology of India. Several buildings including Seekchewali Kothi, Tarawali Kothi etc. were considered for the purpose but ultimately the choice fell on the Chhoti Chhattar Manzil as the Lal Baradari could not be made available. He established a Natural History Municipal Museum in Chhoti Chhattar Manzil in Qaisrabsagh, Lucknow U.P. (Fig. 1-2) and it was the modest beginning of the Lucknow Museum which now is the oldest and the largest multipurpose museum of the state.

Fig. No. 1: Chhoti Chhattar Manzil between Gulistan-e-Eram & Kothi Darshan Vilas
Dr. Bonavia was entrusted the task of looking after the building of museum in the honorary capacity and a petty monthly sum of Rs. 100/- was allocated from the Municipal funds for its functioning. The earlier proposal of the Commissioner to appoint an efficient curator on a monthly salary of Rs. 500/- could not find favour of the Government. On resignation of Dr. Bonavia, Mr. Thorpe, late Superintendent of Awadh Secretariat, was appointed as Officer In charge in 1877 but he also resigned after sometime and Mr. Joyce took over the charge of the Museum. After him, Mr. A. H. Pirie functioned as Secretary for a number of years. In 1873, Riddle Museum of Agra was merged in this museum. In 1880, some important antiquities were brought here from Allahabad Museum. It remained under Municipality till 1883 and in the same year, it was renamed Provincial Museum, Lucknow. In 1884, it was shifted to a larger space available in Lal Baradari (Fig. 3) which functioned as coronation hall of Nawabs of Awadh. A new management committee was constituted and the Commissioner of Lucknow division was appointed as Ex-officio president. The list of additional members nominated by Government included names of Allan Octavian Hume, one of the founder of National Congress & F. S. Growse, the founder of Mathura Museum.
In a meeting held on February 14, 1884, the committee decided that the museum should have the following five departments: Natural History, Ornithology, Physical Science, Economics and Archaeology. In due course of time, the sections of Arts and Numismatics were also added. The other important resolutions of the committee included proper distribution of the work among the staff, restriction on smoking and betel chewing, special arrangements for the admission of female visitors and recording the number of visitors. The first year of the Museum in the Lal Baradari recorded about ninety thousand visitors. On March 30th 1885, Alois Anton Fuhrer (Fig. 4) was appointed the first curator of the museum on a salary of Rs. 250 per month. W. Hoey in a memorandum dated April 8th, 1886, proposed the publication of half-yearly periodical captioned "Miscellaneous Indica". Hoey prepared a report listing the antiquities of the museum which has been referred to as "Hoey's Report" in antiquities registers but it is not available at present. A letter dated the 28th June, 1887 from Lt. Col. G.D. Pitcher records the following observation about the vigilance of the class IV staff: "The appearance of the Museum servants has much improved and they are now a smart, intelligent and vigilant set of man. One of them was recommended for a reward by the city magistrate of Lucknow for apprehending a young man in the act of opening with a screw-driver a case containing valuable exhibits".
The antiquities obtained after the excavations at *Kankali Tila* in 1888-89, 1889-90 & 1891-92 were brought to this museum. During this period, 1179 antiquities obtained through the excavations of Dr. Burgess and Fuhrer at *Mathura*, were added to the collection. Fuhrer prepared a list of antiquities which has been referred to as "Fuhrer's List" in the antiquities registers of the museum but it is not available at present. Museum undertook excavations at *Ahichhatra*, Bareilly U.P. in 1891-92 & nineteen hundred fifty four antiquities were added to the museum collection. The antiquities of *Kasia* excavation by Dr. Jean Phillip H. Vogel (Fig. 5) in 1904-05 were brought to the museum. Numerous finds from a medieval temple at Allahabad and Allahabad Fort Excavations in 1906-07 were added to the collection. During this period only Dr. Vogel again excavated *Kasia* and the collection from there was brought here. Annual report for the year 1904-05 says, “The *Taikhanas* in *Gulistan-e-Eram* which forms part of the museum, were re-roofed with jack arches carried on rolled steel joints. These underground rooms, which are useful as storehouses, hitherto suffered from deficient light and want to ventilation. These effects have now become removed by opening out skylights in the walls and fixing a number of pavements lights in the roof, and the rooms have now become serviceable as store rooms. What is now felt as a pressing want is more space for the Archaeological section. The vaults of the *Lal Baradari*, where that section is now located, are overcrowded”. It also notes, “The total number of visitors who entered the museum by the turnstile amounts to 1,39,418 besides 847 *Pardanasheen* women who visited on the 15th day of every month. These figures show an increase of 16,566 visitors over the total of the preceding year. The largest attendance on the any single day was on the 23rd November 1904, which was the day of the Hindu bathing festival *Kartiki-Purnima*, when 12,144 people mostly villagers from the surrounding country visited the museum. The daily average of visitors for the year was 446”. Annual report for the year 1905-06 says, “The total number of visitors who entered the museum by the turnstile amounts to 1,69,635. This large attendance which exceeds
previous records by nearly 25,000, may be attributed partly to the growing popularity of the museum and partly to the visit of their Royal Highnesses the Prince and Princess of Wales to Lucknow in December last - an event which attracted a large number of visitors to the Awadh capital from distant parts of the United Provinces. Seven hundred and sixty-four Pardanasheen visitors were admitted on the Zanana days which fall on the 15th of every month. Among distinguished visitors, the Hon’ble Lord Curzon of Kedleston visited the museum with his Honour the Lieutenant Governor of these provinces on the 3rd April 1905, and her Royal Highness the Prince of Wales on the 26th February, 1906”.

Annual report for the year 1906-07 mentioned that Dr. J. P. H. Vogel, Honorary Curator, was the in charge of the Archaeological section of the museum. The report again mentioned that a new building for the museum was needed and the overcrowded rooms on the ground floor of Lal Baradari building were insufficient to hold the sculptures and inscriptions collected within last 20 years. They were practically inaccessible to the student of Archaeology and collection of Zoological specimen as well as for Art had suffered from excessive light in the rooms on the first floor. This report further noted that, “The total number of visitors who entered the museum through a turnstile amounts to 145,861 including 1506 pardanashin visitors, for whose admission special arrangements are made on the 15th day of every month. The above figures, though showing a decrease of nearly 18000 visitors compared with the returns of 1905-06, actually exceed the average of past five years by nearly 10,000, fact which establishes the popularity of the institution as a public resort in spite of occasional fluctuations in numbers owing to special causes”. In 1907, the museum was transferred to Gulistan-e-Eram. The museum was formally organized in the same year with the constitution of a management committee. The Calcutta conference of the museum curators of India held in 1907 suggested that the Lucknow
museum should have concentrated on Archaeology and numismatics and a separate museum be developed for the natural history specimens. It was also recommended that the industrial and economic sections should be made over to other departments. Consequently the Government decided to restrict the collections of curiosities or ornamental items and also to dispose of some old collections. The exhibits of botanical and agricultural interest were also eased to other institutions. As a result of this reshuffling the museum retained the sections of Archaeology, Epigraphy, Numismatics and Zoology or natural History. The books were transferred to the Public Library presently known as Amiru-ud-daula public library but later on the volumes of archaeological and numismatic interest were restored to the museum. Annual report for the year 1907-08 mentions that museum should have been shifted to a bigger building and Chhoti Chhattar Manzil & Canning college were identified as the possible options. The report also noted that, “The total number of visitors who entered the museum through a turnstile amounts to 130,041 including 715 pardanashin visitors, who were admitted on the 15th of every month. The largest attendance on single day register on the 19th November last which was the day for the Hindu bath festival Kartiki-Purnima, when the number rose to 8,475”. Six boxes of antiquities from the excavations from Indor khera were brought to the museum in 1908. The catalogue of R. D. Banerjee prepared in 1908-09 mentions four Gandhāra art pieces in the museum (Acc. No. B. 227-230). Annual report for the year 1907-08 mentions that Canning college building was finally chosen for shifting the museum. The report further notes that, “The total number of visitors who entered the museum through a turnstile amounts to 136,253 including 701 pardanashin women who were admitted on the 15th day of every month. The above figure closely reaches the number registered during the preceding year and may be taken as the yearly average. Towards the close of the year museum was twice visited by his Honor the Lieutenant Governor of the provinces. On the second occasion, His honor went over the whole museum to judge of its needs as regards building accommodation. The question was discussed on the spot by the President of the museum committee and the Chief and Financial Secretaries to Government who accompanied his Honor during the visit. The arrangement that has since been made for the housing of the museum in future has been noticed in the earlier paragraph of this report”. The archaeological section found an independent abode in Qaiserbagh, when in 1911 the Canning College shifted to its own building (now Lucknow University) but after ten years it was again shunted back to its parent house as the Government decided to house the Council Chamber at Qaiserbagh. Sixteen boxes containing terracottas potteries, bricks etc. from Kasia excavations by Pandit Hiranand Shastri during 1912-13 were added to the museum collection. Annual report for the year 1914-15 mentions that Babu Prayag Dayal was promoted to the Rank of Supervisor, who later became Curator of the museum. In 1916-17, finds from Sankissa district Farrukhabad U.P. excavations by Pt. Hiranand Shastri were brought to the museum. Annual report for the year 1916-17 mentions that on the 29th March 1917, Pandit Hiranand Shastri went to the Government of India for deputation in Kashmir state and K. N. Dixit (Fig. 5 A) of Prince and Wales, Bombay museum was appointed as the Curator of the museum.
On 31st March, 1919 trustees of Indian Museum Calcutta presented seven pieces of Gandhāra Art to the museum (Acc. No. O. 280-87). Annual report for the year 1918-19 mentions, “The total number of visitors was 149,999 (including 2,354 pardanashin ladies), a figure which is the highest on record since the re-organization of the museum in 1911. Compared with last year, there is an increase of 15,894 which is partly due to the influx of visitors during the exhibition week and partly to the growing interest of the people. Among eminent and distinguished visitors may be mentioned the Hon’ble Sir Spencer Harcourt Butler K.C.S.I.C.I.E Lieutenant Governor of the United Provinces; Sir Marc Aurel Stein, K.C.I.E, Ph. D, Litt., D. Sc. Superintendent Archaeological Survey, Frontier circle. Rai Bahadur Daya Ram Sahni, M.A., Superintendent Hindu and Buddhist monuments, N.C. and G.R. Kays, Esq. of the Bureau of Education, Shimla”. In 1931, two-third of the building was restored and the remaining one-third was occupied by Marris College of Music, now known as Bhatakhande College of Hindustan Music (Fig. 6-7). In December 1931, the museum received 42 pieces of Gandhāra Schist stone and Gandhāra stucco figures (Acc. No. G. 226-256; G. 258-273) from the department of Archaeology, Lahore Circle. Annual report for the year 1936-37 mentions, “There was an appreciable increase in the number of visitors to the Museum especially during the months of November, December and January on account of the influx of visitors to Lucknow in connexion with the United Provinces Agricultural...
and Industrial exhibition of 1936-37. The total number recorded by our turnstile was 248,994 as against 208,243 for the previous year. The daily average for the year was 682. Prominent among distinguished visitors were Major General Rama Shumsher Jang Bahadur, Rana of Nepal; Rao Bahadur K. N. Dixit, M.A. Director General of Archaeology in India; Dr. Eraist Cohn Wiener, Director of Botany, Department Baroda; and Dr. Stella Kramrisch of Calcutta”. Annual report for the year 1939-40 notes that, “Through over hauling was done in the Archaeological section of the museum, which is housed in the Qaiserbagh building. The exhibits of the Jaina and Buddhist sections were classified and rearranged, after an interval of many years, in the central hall and an adjacent room, and new stands were provided for them. An illustrated guide-book to the section of the museum was also prepared. This is now under publication in the Government Press. Our thanks are due to Mr. V. S. Agarwal (Fig. 5 B), who accomplished a dual task of renovating the section and preparing the guide-book during his period of training prior to formal appointment as Curator.

![Fig. No. 5 B: Sri. Vasudev Sharan Agarwal](image)

The completion of the labeling and provision of new showcases will take some time yet. In the northern wing of the Qaiserbagh building important and structural alternations had been proposed in accordance with the recommendations of Sir Leonard Workey with a view to improve the lighting and accommodation. It is the matter of pleasure that the government was pleased to allot money for the work during the year and most of it was executed by Public Works Department before the end of
the year. It is hoped that the remaining items, namely the installations of sky lights in the rooms and corridor and the opening up of the windows on the east side of the hall, will be at the disposal of the museum authorities through the Public Works Department was utilized for the arrangement of the north wing, which is being converted into a medieval gallery to accommodate the Brahmanical sculptures and inscriptions. This work was still in progress at the close of the year. It is expected that the section will be opened for the public next year. Improvements to the Lal Baradari building were also carried out in the shape of the reflooring and replastering of the basements rooms so as to make them damp proof. These are used partly and partly for the reptilian gallery. The completed portion of the Archaeological section in Qaiserbagh was thrown open to the public from November 1939”.

Fig. No. 6: Old Canning College, Lucknow looking from South

Fig. No. 7: Old Canning College in between the Tombs of Khursheed Zadi & Sadat Ali Khan looking from North-east
After this no significant event took place till the year of Independence i.e. 1947, although the collection went on increasing. In 1947, nineteen Gandhāra sculptures and 5 Gandhāra stuccos were added to it by purchase. Annual report for the year 1947-48 says that, “Adequate attention was paid towards scientific arrangements and display of exhibits in various galleries of both the Lal Baradari and Qaiserbagh buildings. The coins of the Kushan rulers in the museum cabinet were thoroughly examined and a detailed list published in the United Provinces Gazette. The tribal coins of Panchala, Taxila, Ayodhya, Mathura, Kaushambi etc. were also classified and arranged in separate cabinets. A large number of Mughal coins which had been put away in covers, were also examined and arranged systematically. In the Natural History and Ethnographic sections attention was directed to better preservation and more scientific display of the collections. Elaborate bilingual labels painted in black and white on wooden blocks were provided to a large number of exhibits”. In 1948, the Government of Uttar Pradesh set up a Museums Reorganization Committee, the recommendations of which had far reaching consequences but unfortunately many of them were not implemented. The committee suggested the following six main sections: (1) Art Section comprising Paintings, Textiles, Metal ware, Wood work and Ivory, (2) Local History Section mainly consisting of period rooms of Nawabi culture, (3) Archaeological Section with the nucleus of Pre-history, Early Indian or Mauryan, Shunga, Kushan, classical Gupta, Medieval, Muslim and Numismatic & Epigraphic items, (4) Natural History, (5) Ethnography including the galleries of cultures of Mirzapur Khasas and Bhotias of Himalayan region mixed culture of Lakhimpur Kheri and Bundelkhand etc. and (6) Children's Section. After sometime the children's sections was disbanded on the emergence of an independent Children Museum known as Moti Lal Nehru Children Museum. The Ethnographic section was neglected and a separate Numismatic Section was carved out of the Archaeological Section. The Art section did not get its due recognition although the collection was large and commendable. Three sculptures (Acc. No. 49.44, 49.45 and 49.225) were added to the collection in 1949. Annual report for the year 1948-49 says that, “The number of visitors during the year was 293,165 as against 267,638 of the past year, the daily average being 803. The highest number of visitors on Ganga Ashnan day was 18,805. Visitors to the archaeological section numbered 35,311. Amongst distinguished visitors who graced the museum by their visit were the Highness the Maharaj of Banaras; Hon’ble Dr. Shri Sampoorananand ji, D. Lit. Minister of Education, Uttar Pradesh, Dr. A. S. Altekar, M.A. D. Lit. Professor and Head of Department of Ancient Indian History and Culture, Banaras Hindu University and Delegation of Burmese Teachers. M. M. Nagar, Curator of the museum discovered the remains of ancient Glass factory, in Kopia Tehsil Khalilabad district Basti now Sant Kabirnagar”. Annual report for the year 1949-50 says, “The number of visitors during the year was 2, 94, 273 as against 2 93, 165 of the past year, the daily average being 806. The highest number being on Ganga Ashnan day was 18,697. Visitors to the Archaeological section numbered 36,192. During the year under review His Excellency Sri Bidhu Shekhar Malik, Governor of United Provinces, was graciously enough to pay a visit to the provincial museum, Lucknow, was taken round by the curator. His Excellency was very much impressed with
the rich collection. It further says, M. M. Nagar studied and systematized the rich archaeological material acquired by him from Kopia and published the results of his studies in various research journals. These together with small notes contributed to the columns of the leading dailies as well as popular Hindi magazines of the province aroused considerable interest amongst the scholars and the general public and lead a large number of them to visit the museum and obtain firsthand information about these rare and valuable objects. He sent a portion of the Kopia glass beads to the Director, Central Glass Institute, Calcutta for analyzing their composition and colour. The result of latters scientific investigation is eagerly awaited as it is likely to throw valuable light on the technique of making and coloring glass in ancient India. Sri Nagar prepared the following articles and contributed them to the journals mentioned against them: (a) New Kings of Kaushambi- Shiksha, (b) Some Jain Sculptures in Lucknow Museum- Shiksha, (c) Kopia- Hon’ble Dr. Sampurnanda Commemoration Volume Banaras, (d) A rare coin of Kumargupta I- Hon’ble Dr. Sampurnanda Commemoration Volume Kalpi, (e) Jaina Sculptures from Rajghat- Chanda Bai Commemoration Volume Arrah, (f) A peep into the Mammal gallery, Provincial Museum, Lucknow- Prani Shastra, Lucknow and (g) A peep into the Bird gallery, Provincial Museum, Lucknow- Prani Shastra, Lucknow”. In 1950, the Provincial Museum, Lucknow, was named as the State Museum Lucknow. Following the recommendations of the Museum Reorganization Committee the Government of U.P. decided to put up a new building of the Museum and Dr. Sampurnanad then Chief Minister of Uttar Pradesh laid the foundation stone in the eastern quarter of Banarasibagh on August 15, 1956. It took about four years and cost 12 lakhs of rupees in completing the V shaped building including the basement, ground floor, first mezzanine, first floor, second mezzanine and second floor. Decision had to be taken between the Lal Baradari and Qaiserbagh building shifting one of them to the new building in Banarasibagh. Meanwhile the unprecedented floods in 1960 forced the transfer of collection from Lal Baradari which had developed cracks and the basement was flooded with water. It took about six months to shift the entire collection from Lal Baradari to Banarasibagh. In 1963, the museum was moved to Nawab Wajid Ali Shah Zoological Gardens formerly known as Prince of Wales Zoological Garden before that Banarasi Bagh, and Prime Minister Jawahar Lal Nehru inaugurated the natural history gallery & anthropology gallery built in the new museum (Fig. 8).
Sri. Neelkanth Purushottam Joshi (Fig. 8 A) was the director of the museum from 16th May 1968 to 30th April 1980. In 1969, museum received seven Gandhāra sculptures pieces (Acc. No. 68.69 - 68.75) from Chandigarh museum in exchange. Sri. Ramesh Chandra Sharma (Fig. 8 B) was the director of the museum from 01th May 1980 to 30th May 1986. This museum at present contains archaeological collection, coin collection, paintings, weapons, decorative arts & musical instruments, Awadh gallery and a huge natural history collection.
List of the Curators of the Provincial Museum: The following is the list of curators of the Provincial Museum Lucknow: Dr. A. A. Fuhrer (From 30th March 1885 to 20th March 1905), Shri. Babu Gangadhar Ganguli (From 21st March 1905 to 20th December 1911), Shri. Pandit Dayaram Sahni (From 21st December 1911 to 10th March 1913), Shri. Pandit Hiranand Shastri (From 11th March 1913 to 28th March 1917), Shri. Pandit K. N. Dixit (From 29th March 1917 to 06th February 1918), Shri. Babu Prayag Dayal (From 07th February 1918 to 27th January 1920), Shri. K. N. Dixit (From 28th January 1920 to 02th August 1920), Shri. Rai Bahadur Babu Prayag Dayal (From 03th August 1920 to 01th February 1940), Shri. Vasudeva Sharan Agarwal (From 02th February 1940 to 22th July 1946), Shri. Madan Mohan Nagar (From 23th July 1946 to 30th August 1951), Shri. K. D. Bajpai (From 31th August 1951 to 31th December 1951) and Shri. Madan Mohan Nagar (From 01th January 1952 to 02th October 1953).

List of the Directors of the State Museum: The following is the list of the Post of curators upgraded as Director, State Museum Lucknow on October 3rd October 1953: Shri. Madan Mohan Nagar (From 03th October 1953 to 28th July 1960), Shri. R. B. Mathur (From 29th July 1905 to ----), Shri. Satya Sharwa (to 15th May 1968), Shri. Neelkanth Purushottam Joshi (From 16th May 1968 to 30th April 1980), Shri. Ramesh Chandra Sharma (From 01th May 1980 to 30th May 1986), Shri. Shiv Dayal Trivedi (From 31th May 1986 to 10th January 1991), Shri. R. P. Shukla (From 11th January 1991 to 03th September 1991), Shri. Jitendra Kumar (From 04th September 1991 to 21th January 1993), Shri. Shiv Dayal Trivedi (From 22th January 1993 to 28th May 1996), Shri. Anand Kumar Singh (From 29th May 1996 to 30th June 1996), Shri. Shiv Dayal Trivedi (From 01th July 1996 to 04th November 1997), Shri. Rakesh Tiwari (From 05th November 1997 to 21th May 1998), Shri. Shiv Dayal Trivedi (From 22th May 1998 to 29th...
August 2000), Shri. Arvind Kumar Srivastava (From 30th August 2000 to 30th June 2001) and Shri. Jitendra Kumar (From 01st July 2001 to 02th September 2002).

**List of the Directors of the U.P. Museum Directorate:** In 2002, U.P. Museum Directorate was constituted and the list of the Directors is as follows: Shri. Jitendra Kumar (From 03th September 2002 to 22th March 2006), Shri. Rakesh Tiwari (From 23th March 2006 to 15th May 2006), Shri. Jitendra Kumar (From 16th May 2006 to 30th June 2008), Shri. Rakesh Tiwari (From 01th July 2008 to 30th May 2009), Shri. R. C. Tiwari (From 31th May 2009 to 31th August 2009), Shri. Rakesh Tiwari (From 01th September 2009 to 28th July 2010), Shri. R. C. Tiwari (From 29th July 2010 to 31th July 2010), Shri. Rakesh Tiwari (From 01th August 2010 to 16th October 2011), Shri. A. K. Pandey (From 17th October 2011 to 31th July 2012), Shri. Rakesh Tiwari (From 01th August 2012 to 12th June 2013), Shri. A. K. Pandey (From 13th June 2013 to 17th April 2016), Shri. Anand Kumar Singh (From 18th April 2016 to 24th June 2016), Shri. Manoj Kumar Singh (From 24th June 2016 to 06th September 2016), Shri. Hariom (From 07th September 2016 to 29th May 2017), Shri. Anand Kumar Singh (From 29th May 2017 to 17th August 2017) and Shri. Anand Kumar Singh (From 18th August 2017 till date).

**History of Publications about Antiquities of the Museum:** Old records of the museum show that the preparations to publish a catalogue were started in the year 1888. The Annual report for the year ending 31st March, 1888 observes, "The rapidity with which the collections are thus augmenting tends to delay the issues of the catalogues. The one for the bird collection is already to be revised and those of the other sections are still under preparation". This very report further points out, "Detailed and classified catalogue of the Buddhist, Jain and Brahmanical sections has been revised up to date". The report says, “The coin catalogue has yet not been issued from the Press, owing to the process of auto-typing, the typical specimen and to the necessity of including all new additions". The Annual report by A. A. Fuhrer for the year ending 31st March, 1889 listed the antiquities from *Kankali Tila, Mathura U.P.* sent to the provincial museum. The work by Fuhrer was continued at *Kankali Tila* in 1889 and 1890. Revised edition of the catalogue of birds was published in 1890. Museum report for the year 1890-91 records large number of antiquities brought from *Kankali Tila*. In 1891, Buhler published an article describing the excavations of *Kankali Tila* by Fuhrer in *Vienna Oriental Journal (Wiener Zeitschrift für die Kunde des Morgenlandes [WZKM])*. Catalogue of the reference library was published in 1891-92. Buhler published large number of *Jain* inscriptions from *Mathura* on the images housed in Lucknow museum in 1892. Catalogue (lists) of the Photographs in the museum was published in 1893-94. In the same year, the detailed catalogue of the Economic Products written by Shri. Gangadhar Ganguli was also published. The museum report for the year ending 31st March, 1896 referred to the discovery of many antiquities from *Kankali* mound and its acquisition by the museum. In 1894, Buhler again published the *Jain* inscriptions from *Mathura* on sculptures pieces, presently kept in this museum in *Epigraphia Indica Vol. II* and wrote another article describing specimen of *Jain* sculptures from *Mathura U.P.* kept in the museum, in the same
volume of *Epigraphia Indica*. Buhler again published some inscriptions in 1896 in Vienna Oriental Journal (Wiener Zeitschrift für die Kunde des Morgenlandes [WZKM]). In 1901, Vincent Smith published his book *The Jaina Stupa and Other Antiquities of Mathura*, describing the finds from *Kankali Tila* and surrounding areas of *Mathura*. In 1904, Heinrich Luders wrote about some inscriptions of this museum in his article titled *Epigraphical Notes* published in *Indian Paleography* edited by J. G. Buhler. In 1905-06, Vogel published the excavation report of *Kasia* excavation. Catalogue of archaeological antiquities received proper attention in the year 1908 when Dr. Jean Philippe Vogel recommended the appointment of Shri. Rakhal Das Banerjee of Indian Museum, Calcutta to take up this work on payment basis. In April 1909, the entire catalogue in seven typed volumes was ready but it was further decided that before its publication it should be revised by Dr. Vogel. Thus the matter was delayed. Meanwhile Dr. Vogel left India and settled in Holland. The manuscript was sent to him but he could not return it immediately perhaps he withheld for the fear of its being lost in the transit. It seems that the original work done by Banerjee never came back and its copy thus buried in the record room of the Provincial Museum, Lucknow, as it was then called, only to be consulted at times by a privileged few. In 1920, C. J. Brown published catalogue of coins (*Mughal* emperor) housed in the museum in two volumes. Rao Bahadur Kashinath Narayan Dixit succeeded Pandit Hiranand but remained in this position only for a short period. In 1920, Committee of the museum published the catalogue of *Gupta* and *Maukhari* coins. From 1921-1940, the curator chair came to be occupied by Rai Bahadur Prayag Dayal who was an eminent Numismatist. In 1921, K. N. Dixit published a monograph on Six Sculptures obtained by the museum from *Mahoba U.P.*. In 1922, *Hiranand Shastri* published inscriptions on some sculptures of the museum. In 1926, the catalogue of the coins of *Sultans* of Delhi was published by Shri. Prayag Dayal. In 1927, Pandit Hiranand Shastri published a report titled "Excavations at *Sankissa*". In 1934, he again published an article titled important sculptures added to the Provincial Museum, Lucknow during the Last decade. In 1939, Prayag Dayal published the catalogue of the coins of *Awadh*. In 1948, a list of exhibits acquired for museum and general working of the museum was published in the Annual Report on the working of the Provincial museum, Lucknow. In 1951-52, K. D. Bajpai published an article about the image of *Tirthankara Muni-Suvrata* housed in the museum. In 1952, *Jain Shilalekha Sangraha* was published by *Pandit Vijaymurti* which describes the inscriptions on *Jain* images kept in Lucknow museum. In 1954, a list of exhibits acquired for museum and general working of the museum was published in the Annual Report on the working of the Provincial museum, Lucknow. In 1957, *Madan Mohan Nagar* published an article about the image of *Kartikeya* which at that time was recently acquired by the museum. In 1961, Klaus Ludwig Janert edited the unpublished papers of Heinrich Luders which described the inscriptions found from different places of *Mathura U.P.* This work included the inscription on some of the images of Lucknow Museum. In 1961, M. L. Nigam published an article titled Impact of *Jainism* on Mathura Art. In this article, he described many images of Lucknow Museum including the famous *Naigamesha* image (Acc. No. J-626). In 1961, a consolidated report on
the working of the State Museum, Uttar Pradesh for the period from April 1st, 1954 to March 31st 1960 which contains the exhibits and antiquities acquired by the museum during the same period was published\(^24\). In 1965, Vasudeva Sharan Agarwal wrote a book titled *Studies in Indian Art* which described some of the images kept in the museum\(^25\). In 1965, C. R. Singhal published a book titled *Supplementary Catalogue of Mughal Coins in the State Museum, Lucknow*\(^26\). In 1966, Vasudeva Sharan Agarwal again wrote a book in Hindi titled *Bhartiya Kala [Prarambhik Yug se Teesri Shati Isvi Tak]* which described some of the sculptures of this museum\(^27\). In 1968, Nilkantha Purushottam Joshi wrote an article titled *Prarambhik Vishnu Murtiyan ka ek adhyayan* which includes the description of some of the images of the museum\(^28\). In 1969, N. P. Joshi again wrote an article titled *Devi Shadmukhi or Shashthi* which includes the description of the image of goddess kept in the museum\(^29\). R. C. Agarwal wrote an article about the same goddess which included image of the goddess kept in the museum\(^30\). R. C. Sharma *et. al.* wrote an article on *Kushan* antiquities which included some of those kept in the museum\(^31\). In the same year, N. P. Joshi and R. C. Sharma published a book titled *Catalogue of Gandhāra Sculptures in the State Museum, Lucknow*\(^32\). In 1971, N. P. Joshi published an article titled *Harivansh ke kuchh Kushan Kalin Shloka* which referred to some sculptures of this museum\(^33\). In 1972, N. P. Joshi published *Catalogue of the Brahmanical Sculptures in the State Museum, Lucknow Part- I*\(^34\). In 1969, A. K. Srivastava published a catalogue of Indo-Greek coins of this museum\(^35\). In 1972, J. P. Jain published an article titled *Genesis of Jain Literature and the Saraswata Movement* in Bulletin of Museums and Archaeology in U.P. No. 9\(^36\). In 1972, P. C. Little described the antiquities of this museum in his article *Swastika: Some Facts and Fallacies*\(^37\). In 1972, U. P. Shah published the article titled *Beginnings of Jain Iconography* which included some examples from this museum\(^38\). In 1972, A. K. Srivastava published the catalogue of *Saka Pahlav* coins of north India kept in the museum\(^39\). In 1976, R. Srivastava published an article *Kushan Prastar Murtiyon me Manoranjan ke Drishya* which included some images of the museum\(^40\). In 1976, N. P. Joshi published his book *Prachin Bhartiya Murti vagyan*. It is a landmark publication in the field of iconography\(^41\). In 1980, A. K. Srivastava published a book on the coin hoards of Uttar Pradesh\(^42\). In 1981, R. C. Sharma published an article titled *Gupta Sculpture from Mathura* which included some examples of this museum\(^43\). In 1984, He published the book titled *Buddhist Art of Mathura*. Some of the sculptures mentioned in the book are from this museum\(^44\). In 1984, Prof. M. N. P. Tiwari published an article about *Bahubali* images of this museum\(^45\). In the same issue, R. C. Sharma wrote an article titled *Early Phase of Buddhist Icons at Mathura*. This included antiquities from this museum\(^46\). In 1986, Gritli Von Mitterwallner wrote a book titled *Kushan Coins and Kushan Sculptures from Mathura*. This book describes many sculptures from the museum\(^47\). In 1989, Shiv Dayal Trivedi published a book titled *Masterpieces in the State Museum Lucknow*\(^48\). In 1989, N. P. Joshi published the part two volume 1st & 2nd of *Catalogue of the Brahmanical Sculptures in the State Museum, Lucknow*\(^49\). In 1993, S. N. Upadhyay wrote an article titled *Rajya Sangrahalaya, Lucknow me Sangrahit Prathihrakalin Durlabh Murtiyan* describing *Pratihar* images kept in the museum\(^50\). In the same year, S. C. Kala wrote a book titled ‘*Terracotta of North India*’ (Kala, K. C.

**Catalogue:**

Following is the catalogue of the Jain (Kankali Tila), Bauddha (Mathura) & Gandhar Antiquities kept at State Museum, Lucknow U.P:
Jain Antiquities

1st century B.C.

Antiquity No. - J-97
Size - 30x19x9 cm
Material - Red Sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st century B.C.
Description - It is the part of a female below the waist. She wears a broad three stringed girdle, very heavy anklets and spiral shaped anklets. The one end of the lower garment hang in front. Another end of the upper garment flung across her legs is held in her left hand. A very thick ornamented object is hanging on her right side.
Antiquity No. - J-642
Size - 86x28x75 cm
Material - Sandstone
Condition - Damaged
Provenance - Kankali Tila, Mathura U.P.
Period - 1st century B.C.
Description - It is the image of a man riding a bull and holding a long spear. This reminds of later iconography of Shiva where he is shown riding a bull⁹⁰.
Saka year:

Fig. No. 11: Figure of pedestal and legs of a Jain Tirthankara

Fig. No. 12: Inscription on the pedestal of the image
Fig. No. 13: Inscription on the pedestal of the image

Antiquity No. - J-3
Size - 28x50x10 cm
Material - Red Sandstone
Condition - Damaged
Provenance - Kankali mound, Mathura U.P.
Period - Saka year 4 (82 A.D.)
Description - It is the pedestal and legs of a Jain Tirthankara\textsuperscript{61}. There is an inscription on the pedestal of the image and it reads:

\textbf{A. Siddham sa 4 gri 12 di 20 varnato aryahattakiyato kulato vajanagarit[esha]}

| Description   | It is a sculptural fragment showing the lower part of the image of *Jain Tirthankara*. There is an inscription on the pedestal of the image to the following effect: |

A. 1. - - - " de[va]putrasya ka [ni] shkasya sam 5 he 1 di 1 etasya puvvra[alyam kottiyato ganato brahmadasika[to]  
B. 1. Palasya dhi[ta]- - -  
A. 2. [ku]lato [u]chenagarito shakhato sethii- - h- - sya i - i - i - i - - senasya sahcharikhudaye de [va]-  
B. 2. vadhmansya prati[ma] ||
Translation: [Success] In the year 5 of Devputra Kanishka, in the first (month of) winter, on the first day, - on that (date specified as) above, - an image of Vadhmana (Vardhmana) (was dedicated) by Khuda (Kshudra), consort of alderman (sethi). . . . . . . (and) daughter of Deva. . . .pala, out of the Kottiya gana, the Bamhadasika kula, the Uchenagari shakha63.

Fig. No. 16: Headless image of Tirthankara

Fig. No. 17: Inscription on the pedestal of the image
Antiquity No. - J-6
Size - 110x94x30 cm
Material - Red Sandstone
Condition - Damaged
Provenance - Kankali mound, Mathura U.P.
Period - Saka year 7 (85 A.D.)
Description - It is a headless image of Tirthankara. There is an inscription on the pedestal of the image and it reads:

1. [Siddham ||] maharajasya rajatirasya devaputrasya vahikanishkasya san 7 he 1 di 10 5 etasva purvvyam aryodihikiyato

2. ganato aryyanagabutikiyato kulato ganisya aryyubuddhshirisya shivyyo vachko aryyas[ndhi]kasya bhagini aryyajaya aryyagoshtha- - - -

Translation: Success! In the year 7 of the great king, supreme king of kings, the son of the gods, Shahi Kanishka, in the first (month of) winter, on the fifteenth day, - on the (lunar day specified) above, preacher Aryya[sandh]ika, the pupil of the ganin Aryya-Buddhasiri (Arya-Buddhasari) of the Aryyodehikiya (Arya-Uddehikiya) school (and) of the Aryya-Nagabutikiya (Arya-Nagabhulikiya) line of teachers, his sister Arya-Jaya (Arya-Jaya), Aryya-Goshtha- - - -64.
Fig. No. 18: Lower portion of Chatuski

Fig. No. 19: Inscription on the pedestal on one side of Chatuski
Fig. No. 20: Lower portion of Chatuski

Fig. No. 21: Lower portion of Chatuski
Fig. No. 22: Lower portion of Chatuski

Antiquity No. - J-684
Size - 18x25x18 cm
Material - Red Sandstone
Condition - Damaged
Period - Saka year 14 (92 A.D.)
Description - It is the lower portion of Chatuski carved with the images of four Tirthankaras on four sides. The pedestal shows dharmachakras kept on pillars and flanked by devouts on all four sides. The pedestal is inscribed on all four sides.⁶⁵
Fig. No. 23: Image of a tirthankara standing in kayotsarga mudra

Antiquity No. - J-8
Size - 63x26x11 cm
Material - Red Sandstone
Condition - Damaged
Provenance - Kankali Tila, Mathura U.P.
Period - Saka year 18 = 96 C.E.
Description - It is the mutilated sculpture of a tirthankara standing in kayotsarga mudra on a pedestal carved with two devotees worshipping chakra kept on a pillar. There are diminutive figures of Yaksha and Yakshi on both sides of Tirthankara. The pedestal bears a two line inscription which reads as follows:

A. - - - - - - sha 10 [8] va 2 di 10 1

**Period** - Saka year 20 (98 A.D.)

**Description** - It is a sculptural fragment showing the lower portion of an image standing on a pedestal. There is an inscription on the pedestal of the image and it reads:

B. 1. - - - - - gato vachakasya aryasanghasihasya nirvarttna datilasya mati - - -

C. 1. Shraavikaye di-

B. 2. lasya kuthumbaniye jayavalasya devadasasya nagadinasya cha nagadinay cha matu

C. 2. [na]ye danam

C. 3. vardhmanpra-

C. 4. tima |

Translation: Success! The year 20, Summer month 1, day 15- at the request of the preacher (vachaka) Aryya-Sanghasiha (Arya-sanghasimha) out of the Kottiya school (gana), the Thaniya family (kula), the Veri (vajri) branch (shakha) and the Sirika sambhoga, an image of Vardhmana, the gift of the female lay-hearer (shravika) Dina (Dinna), the .. .. of Datila. .. .. the housewife of Matila, the mother of Jayavala (Jayapala), Devdasa, and Nagdina (Nagadatta) and Nagdina (Nagadatta)\(^6\).

---

*Fig. No. 26: Lower portion of the image of a seated Jain Tirthankara*
Antiquity No. - J-11  
Size - 33x42x16 cm  
Material - Red Sandstone  
Condition - Damaged  
Provenance - Mathura U.P.  
Period - Saka year 22 (100 A.D.)  
Description - It is the lower portion of the image of a seated Jain Tirthankara. There is an inscription on the pedestal of the image and it reads:

1. Siddha sava 20 2 gri 1 di - - - sya puruvayam vachakasya arryamatridinasya ni - - -

2. sarttavahiniye dharmasomaye danam || namo arhamtan

Translation: Success! The year 22, summer (month) 1 day... on the (date specified as) above, at the request of the preacher Aryya-Matridina (Arya-Matridatta), the gift of Dharmmasoma, the wife of a Sarthwaha (caravan) - - - leader. Adoration to the Arhats!

Fig. No. 27: Headless image of Mahavira  
Fig. No. 28: Inscription on the pedestal
Antiquity No. - J-31
Size - 78x65x21 cm
Material - Red Sandstone
Condition - Damaged
Provenance - Kankali Tila, Mathura, U.P.
Period - Saka year 22 = 100 A.D.
Description - It is the headless image of Mahavira. The pedestal bears one line inscription\(^69\). There is an inscription on the pedestal and it reads:

\[ \text{[Si]dhdham sam 20 (?) [2] gri 2 di 7 vardhmansya pratima varnati ganato petivami[ka]-} \]

Success! In the year 22 (?), in the second (month of) summer, on the seventh day, a statue of Vardhamana, from the Varana gana, from the Petivamik [a kula] - - - -

Fig. No. 29: Pedestal of a Jain image
Antiquity No. - J-12  
Size - 20x23x13 cm  
Material - Red Sandstone  
Condition - Damaged  
Provenance - Kankali mound, Mathura U.P.  
Period - Saka year 25 (103 A.D.)  
Description - It is a sculptural fragment showing the pedestal of a Jain image. There is an inscription on the pedestal of the image and it reads:

A. 1. Savatsare pachvishe hemantam[se] tritiye divase veeshe asmi kshune

B. 1. Kottiyo ganato br[amha]dasikato kulato uchenagrito shakhato ayabaltratasya shisho sadhi-

2. sya shishini grahi- - - i- - - vatan [na]dia[ri]ta jabh[ka]sya vadhu jay[bha]ttysya kutumbiniya rayginiye [vu]suya [||]

Translation: In the twenty-fifth year, in the third month of winter, on the twentieth day, at this moment (?), a vusuya (?), (was dedicated) by Rayagini, the daughter-in-law of Jabhaka, from Nandigiri (?), (and) wife of Jayabhatta, the request (having been made) by graha..i...., the female pupil of Sadhi, pupil of the venerable Balatrata (Balatrata) out of Kottiya gana, the Brahmadasika kula (and) the Ucheaagri shakha.
Fig. No. 30: Lower portion of a standing Jain figure

Fig. No. 31: Inscription on the pedestal of the image
Antiquity No. - J-13
Size - 46x34x16 cm
Material - Red Sandstone
Condition - Damaged
Provenance - Kankali Tila, Mathura U.P.
Period - Saka year 29 (107 A.D.)
Description - It is a sculptural fragment showing the lower portion of a standing figure. There is an inscription on the pedestal of the image and it reads:

A. 1. Ekanati[sha]
C. 1. - - - -

A. 2. va- - -
B. 2. - [ha]rabal
C. 2. pratisa - - -
D. 2. [va]si[ka] nagadasya shisho mi[gaka] - - -o- -sa- - -

Translation: It is only evident that D. 1-2 gives us the names of the Maharaja Devaputra Huksha, (Hushka or Huvishka), and of a monk named Nagadata (Nagadatta). It may also be suggested that the inscription begins with D. 1 because that line contains the group sdha, an abbreviation of Siddham, and the name of the king. The continuation may possibly be looked for in A 1, where the word ekunatisha, the twenty-ninth, seems to indicate the date. The year 29 would fall in the reign of Huvishka.
Fig. No. 32: Pedestal of the image of Mahavira

Fig. No. 33: Inscription on the pedestal of the image

Antiquity No. - J-14
Size - 25x76x20 cm
Material - Red Sandstone
Condition - Damaged
Provenance - Kankali Tila, Mathura U.P.
Period - Saka year 29 (107 A.D.)
Description - It is the pedestal of the image of Mahavira\textsuperscript{22}. There is an inscription on the pedestal of the image and it reads:

Translation: In the year 29 of the great king. . . shka, in the second month of winter, on the thirtieth day. . . - at this moment (?), an image of the divine Vardhmana was set by order of Bodhinadi (Bodhinandi ?), a married lady, the cherished daughter of Grahahathī (Grahahastin) at the request of Gahaprakīva (?) pupil of the venerable Data, a ganin in the Varana gana and the Pushyamitriya (Pushyamitriya) kula, in the honour of Arhat.
Fig. No. 34: Headless image of Mahavira

Fig. No. 35: Inscription on the image
### Antiquity No. - J-16
### Size - 58x42x12 cm
### Material - Red Sandstone
### Condition - Damaged
### Provenance - Kankali Tila, Mathura U.P.
### Period - Saka year 35 (113 A.D.)
### Description - It is a sculptural fragment showing the seated image of Mahavira. There is an inscription on the pedestal of the image and it reads:

B. 1. Vairato sh[aj]kha to shirikato sam[bho]kato aryyabdinasya shishini kumarami[ta]

2. tasya putro kum[a]rbhati gandhiko tasa-na pratima vardhamansya sashitamakhita[bo]dhita

C. 1. A[ryya]

2. kumar-

3. mitra-

4. ye-

D. 1. Vrva

2. [ta]na[111]

Translation: Success! In the year 35 in the third (month of the) rainy season, on the tenth day, on that (date specified as) above; the female pupil of the venerable Baladina (Baladatta) out of the Kottiya gana, the Sthaniya kula, the Vaira shakha (and) the Sirika sambhoka (sambhoga), (was) Kumaramitra (kumaramitra); her son (was) the dealer in perfumes, Kumarbhati; his gift (is) an image of Vardhmana (dedicated at) the request of the whetted, polished and awakened venerable Kumarmitra.
Fig. No. 38: Pedestal of the image of Rishabhanatha

Fig. No. 39: Inscription on the pedestal of the image

Antiquity No. - J-26
Size - 22x75x27 cm
Material - Red Sandstone
Condition - Damaged
Provenance - Kankali mound, Mathura U.P.
Period - Saka year 40 (118 A.D.)
Description - It is the pedestal of the image of Rishabhanatha. There is an inscription on the pedestal of the image and it reads:

B. Shishasya ganisya aaryyakha[rna]sy a puyyam[na] - - - - - - [sy a] - - [va] takasya [ka] - - sakasya kutumbiniye dattaye - - nadharmmo mahabhogtaya preeyatabhagwanrishamshree:

Translation: Success! In the year 40 (60?) of the great king (and) supreme king of kings, Devaputra Huvashka, in the fourth month of the winter, on the tenth-day, (on that (date specified as) above, (this) meritorious gift (was made) for the sake of great happiness by Datta, the wife of Kapasaka, an inhabitant of . . . vata, (at the request) of . . . . . . ganin, the venerable Kharnna, pupil of the preacher, the venerable Vriddahasti out of the Kottiya gana, the Sthanikiya kula (and) the shakha of the Aryya-Veriyas (the followers of the Arya-Vajra). May the divine (and) glorious Rishabha be pleased!
Fig. No. 40: Figure of Chatuski with the images of tirthankaras standing in kayotsarga mudra

Fig. No. 41: Inscription on the pedestal of the image on one side of the chatuski figure
Antiquity No. - J-234
Size - 90x29x28 cm
Material - Red Sandstone
Condition - Damaged
Provenance - Kankali mound, Mathura U.P.
Period - Saka year 40 (118 A.D.)

Fig. No. 337: A sculptural fragment

Antiquity No. - J-41
Size - 24x16x3 cm
Material - Red sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is a sculptural fragment. There is an inscription on the lower part of the image and it reads as: ya[p]asa\textsuperscript{183}. 
Fig. No. 338: Sculptural fragment carved with shaft and capital of a pillar

Antiquity No. - J-43
Size - 24x15x3 cm
Material - Sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is a sculptural fragment carved with shaft and capital of a pillar. It has one line inscription.
Fig. No. 339: Sculptural fragment showing a pillar supporting a pedestal

Antiquity No. - J-64
Size - 18x25x3 cm
Material - Sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is a sculptural fragment showing a pillar supporting a pedestal on which probably two persons are sitting. There is one line inscription on the pedestal.
Fig. No. 340: Figure of a pillar

Antiquity No. - J-270
Size - 78x19x12 cm
Material - Red sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is a pillar decorated with the figure of a male standing below a tree on the pedestal on the obverse side and the reverse side is decorated with medallion carved with lotus flowers.

184
Fig. No. 341: Figure of a pillar decorated with circular and half-circular medallions

Antiquity No. - J-346
Size - 55x18x13 cm
Material - Red sandstone
Condition - Damaged
Period - 1\textsuperscript{st}-2\textsuperscript{nd} century A.D.
Description - It is a pillar decorated with circular and half-circular medallions carved with lotus flower motifs.
Fig. No. 342: Figure of a pillar

Antiquity No. - J-348
Size - 65x17x21 cm
Material - Sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is a sculptural fragment carved with floral motifs between two pillars housed inside a square niche.

Fig. No. 402: Head of a lion

Antiquity No. - J-602  
Size - 13x11x6 cm  
Material - Red sandstone  
Condition - Damaged  
Period - 1st-2nd century A.D.  
Description - It is the lion head.
Fig. No. 403: Figure of a winged lion

Antiquity No. - J-639
Size - 25x31x14 cm
Material - Red sandstone
Condition - Damaged
Provenance - Kankali Tila, Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is the figure of a winged lion.203
Antiquity No. - J-650
Size - 82x56x34 cm
Material - Red sandstone
Condition - Damaged
Provenance - Balbhadra mound, Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is a broken figure of a lion.
Antiquity No. - J-651
Size - 19x12x9 cm
Material - Red sandstone
Condition - Damaged
Period - 1st-2nd century A.D.
Description - It is the leg and mane of a lion.
Fig. No. 406: Figure of a lion faced gargoyle

Antiquity No. - J-667
Size - 25x30x13 cm
Material - Sandstone
Condition - Damaged
Period - 1st-2nd century A.D.
Description - It is the lion faced gargoyle.
Fig. No. 407: Upper part of an image

Antiquity No. - J-105
Size - 56x62x20 cm
Material - Red sandstone
Condition - Damaged
Provenance - Kankali Tila, Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is the upper part of an image showing a portion of an umbrella, a winged proto *maladhari vidyadhara* with a tail and another divine attendant above him also flying & holding a folded cloth. 

204
Fig. No. 408: Upper part of an image

Antiquity No. - J-106  
Size - 46x50x12 cm  
Material - Red sandstone  
Condition - Damaged  
Provenance - Kankali Tila, Mathura U.P.  
Period - 1st-2nd century A.D.  
Description - It is a sculptural fragment showing the upper part of an image carved with an umbrella and a flying winged attendant also having a tail & holding a flower in his left hand. His right hand is raised.  

205
Fig. No. 409: Figure of a broken panel

Antiquity No. - J-119 (?)  
Size - 19x41x16 cm  
Material - Sandstone  
Condition - Damaged  
Provenance - Mathura U.P.  
Period - 1st–2nd century A.D.  
Description - It is a broken panel decorated with flower motif on the right side and a creeper growing out of a pot and another creeper emerging from left side.
Fig. No. 410: Figure of a panel carved with the scene of Buddha preaching Suddhodana

Antiquity No. - J-531  
Size - 41x26x12 cm  
Material - Red sandstone  
Condition - Damaged  
Provenance - Kankali mound, Mathura U.P.  
Period - 1st-2nd century A.D.  
Description - It is a panel carved with the scene of Buddha preaching Suddhodana. A pillar with lion capital is visible on the extreme right side. Three attendants stand behind the king. One of them is holding an umbrella²⁰⁶.
Fig. No. 411: Figure of Shasthi standing on right side of headless Kartikeya

Antiquity No. - J-84
Size - 53x52x11 cm
Material - Red sandstone
Condition - Damaged
Provenance - Kankali mound, Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is a sculptural fragment showing Shasthi standing on right side of headless Kartikeya holding the shaft of Shakti.\textsuperscript{207}
Fig. No. 412: Headless mutilated figure of a dhoti wearing male

Antiquity No. - J-103
Size - 76x40x12 cm
Material - Sandstone
Condition - Damaged
Period - 1st-2nd century A.D.
Description - It is a sculptural fragment showing the headless mutilated figure of a dhoti wearing male holding fly whisk in his right hand and folds of his lower garment in his left hand. He is also wearing four stringed broad har, bangles and keyura in the shape of twisted rope.
Fig. No. 413: Figure of the middle portion of a male

Antiquity No. - J-127  
Size - 6x19x15 cm  
Material - Sandstone  
Condition - Damaged  
Provenance - Mathura U.P.  
Period - 1st-2nd century A.D.  
Description - It is the sculptural fragment showing the body of a male from waist to knee in standing posture. A human figure is carved on his left thigh above lower garment.
Fig. No. 414: Middle portion of a lady standing and holding a stick

Antiquity No. - J-131
Size - 21x20x10 cm
Material - Sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is the middle portion of a lady standing and holding a stick. She is wearing short lower garment supported by multi-stringed girdle with a large buckle in the middle. A pestle like cloth is hanging from the buckle.
Fig. No. 415: Figure of a male in *sukhasana mudra*

- **Antiquity No.**: J-273
- **Size**: 28x41x13 cm
- **Material**: Sandstone
- **Condition**: Damaged
- **Period**: 1st-2nd century A.D.
- **Description**: It is the figure of a male in *sukhasana mudra* with his left hand resting on his folded leg.

**Description**

It is a sculptural fragment. There is an inscription on the slab and it reads: *Bhagavā Nemiso* means "Divine lord Naigamesha". This deity is referred to as *Bhagawā Nemeso*, the divine Nemoso, is a variant of the deity called *Harinaigameśī*, in the *Kalpasūtra*, *Naigamesi* in the...
Neminatha Charitra, and Nejamesha or Naigameya in other words. The god sometimes has the head of ram, sometimes has the head of an antelope and sometimes has the head of a goat. In all his forms, whether in Jain or Brahmanical mythology, he is associated with the procreation of children. He is regarded in two aspects: one as a beneficent and the other as a malevolent deity. The obverse side of the sculpture shows a missing person addressed by the goat headed god. He must have been Indra. It appears that the scene is set in Indra's heaven after the embryo of Mahavira had been transferred from the womb of Devananda to that of Trishala. The group on the reverse of the slab is evidently rejoicing at the successful accomplishment of the transfer of the child. The contemptuous reference in the Kalpasūtra to "a low Brahmanical family" is interesting.

**Description** - It is a mutilated two handed image of Vishnu in standing posture. His gada in the shape of musal and chakra can be seen on right and left side. A devotee is kneeling on his right side.219
Fig. No. 465: Figure of a stone slab

Antiquity No. - J-616
Size - 27x18x5 cm
Material - Red sandstone
Condition - Damaged
Period - 1st-2nd century A.D.
Description - It is a stone slab carved with floral design\textsuperscript{220}. 

Fig. No. 466: Figure of a stone slab

Antiquity No. - J-620
Size - 15x18x5 cm
Material - Sandstone
Condition - Damaged
Period - 1st-2nd century A.D.
Description - It is a stone slab decorated with flower motif and closely spaced check motif.
Fig. No. 467: Stone slab carved with two flying lions

Antiquity No. - J-638
Size - 27x25x22 cm
Material - Red sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is a stone slab carved with two flying lions and other floral motifs.\textsuperscript{221}
Fig. No. 468: Piece of a stone slab

Antiquity No. - J-890
Size - 20x24x11 cm
Material - Sandstone
Condition - Damaged
Period - 1st-2nd century A.D.
Description - It is a piece of a stone slab carved with flower and flower petal motifs.
Fig. No. 469: Part of a window lattice

Antiquity No. - J-708  
Size - 11x12x6 cm  
Material - Sandstone  
Condition - Damaged  
Period - 1st-2nd century A.D.  
Description - It is part of a window lattice carved in the shape of flowers.
Fig. No. 470: Part of a window lattice

Antiquity No. - J-709 a
Size - 17x20x6 cm
Material - Sandstone
Condition - Damaged
Period - 1st-2nd century A.D.
Description - It is the part of window lattice carved in the shape of flower.
Antiquity No. - J-534
Size - 31x34x10 cm
Material - Sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is a sculptural fragment having an inscription in the middle which reads: 
……[ruppinçaṭṭa]kuṭumbinaḥ putraḥ and it means …..the son of the householder ….. ruppinçaṭṭa (?)……
It shows two Tirthankaras sitting in dhyana mudra.

Fig. No. 518: Figure of an Ayagapatta

Fig. No. 519: Inscription on the top of Ayagapatta
Antiquity No. - J-1
Size - 103x97x10 cm
Material - Red andstone
Condition - Damaged
Provenance - Kankali mound, Mathura U.P.
Period - 2nd century A.D.
Description - It is an Ayagapatta and an inscription on the top records that this was dedicated to Mahavira during the reign of Mahakshatrapa Sodasa by Amohini, wife of Pala, son of Hariti along with her sons Palghosa, Proshthaghosha and Dhanaghosha. It bears a four line inscriptions at the top of the patta which reads as follows:

1. nama arahato vardhamanas
2. sva[misa mahakshatrapasa shodasasa savatsare 40 (?) 2 hemantamase 2 divase haritiputras palas bhayaye
   samasavikaye
3. kochhiye amohiniye saha putrehi palghoshen pothghoshen dhanghoshen aayavati pratithapita
4. aryavati arahatapujaye

Translation: "Adoration to the Arhat Vardhmana! In the year 42 (?) of the lord, the Mahakshatrapa Sodasa, in the second month of the winter, on the 9th day, an Ayavati (Aryavati), was set up by Amohini (Amohini), the Kochhi (Kautsi), a female lay disciple of the ascetics (and) wife of pala, son of Hariti (Hariti or Hariti mother), together with her sons Palaghosha (Proshthaghosha and) Dhanaghosha . . . . the Aryavati (is) for the worship of the Arhat." 236.
Fig. No. 520: Image of Mahavira sitting in dhyana mudra on a sīzhāsana

Fig. No. 521: Inscription on the pedestal of the image
Antiquity No. - J-59
Size - 77x46x14 cm
Material - Red sandstone
Condition - Damaged
Provenance - Kankali Tila, Mathura U.P.
Period - 2nd century A.D.
Description - It is the image of Mahavira sitting in dhyana mudra on a siṁhāsana carved with four devotees worshipping chakra with folded hands. There is a two line inscription on the upper part of the pedestal which reads as follows:

(1.) . . . . . . . . . . arhatanam vadhmanasya [ka]lasya dhitu sinvishubha jha[sin]a[ly]a
(2.) . . . . . . . . . . [ya]ti[sva i[nav]tran[a]

Translation: . . . . . . . . . . [an image] of the worshipful "Arhat Vadhmana, [the gift] of . . . . . . the daughter of Kala, the sister (?) of Sinavishu (Vishnushena ?); the request of . . . . . . Sati (?)" 237.
Fig. No. 522: Image of a Tirthankara sitting in dhyana mudra

Antiquity No. - J-60  
Size - 75x43x12 cm  
Material - Red sandstone  
Condition - Damaged  
Provenance - Kankali Tila, Mathura U.P.  
Period - 2nd century A.D.  
Description - It is the image of a Tirthankara sitting in dhyana mudra and flanked by two divine attendants (probably Indra & Upendra) standing with folded hands. He is seated on a sīrīhāsana carved with six devotees worshipping chakra. His abhamandala is decorated with circular bands of gaja nakha design, beaded stringed design, floral motif and gaja nakha design with a circular lotus in the middle.
Fig. No. 523: Image of Neminatha sitting in dhyana mudra

Antiquity No. - J-117  
Size - 61x36x17 cm  
Material - Red sandstone  
Condition - Damaged  
Provenance - Mathura U.P.  
Period - 2nd century A.D.  
Description - It is the image of Neminatha sitting in dhyana mudra on a simhasana carved with four devotees. He is flanked by Krishna and Balrama. His parikar has maladhari vidyadhara and his kaivalya vriksha. His abhamandala is decorated with gaja nakha, beaded string, sphere head and oval band. The image given by Smith shows complete head but in the present condition the face is missing239.

**Antiquity No.** - J-553  
**Size** - 19x17x10 cm  
**Material** - Sandstone  
**Condition** - Damaged  
**Provenance** - Mathura U.P.  
**Period** - 2nd century A.D.  
**Description** - It is a sculptural fragment decorated with lotus petals and floral motifs on the obverse side and floral motifs on the reverse side.
Antiquity No. - J-909
Size - 42x24x19 cm
Material - Sandstone
Condition - Damaged
Period - 2nd century A.D.
Description - It is an architectural fragment carved with rounded and rectangular molding, grooves and floral motifs.

Fig. No. 529: An architectural fragment
Fig. No. 530: Part of a doorjamb

Antiquity No. - J-912
Size - 129x33x20 cm
Material - Sandstone
Condition - Damaged
Period - 2nd century A.D.
Description - It is a part of doorjamb decorated with simple molding and floral band.
Fig. No. 531: Lower part of the image of Tirthankara seated on a *siṁhāsana*

**Antiquity No.** - J-952
**Size** - 42x43x15 cm
**Material** - Red Sandstone
**Condition** - Damaged
**Period** - 2nd century A.D.
**Description** - It is the lower part of the image of Tirthankara seated on a *siṁhāsana* which is flanked by two devotees.
2nd-3rd century A.D.

Fig. No. 532: Lower left part of the image of seated Buddha

Fig. No. 533: Inscription on the pedestal of the image

Antiquity No. - J-55
Size - 28x23x7 cm
Material - Sandstone
Condition - Damaged
Provenance - Mathura, U.P.
Period - 2nd-3rd century A.D.

Description - It is the lower left part of the image of seated Buddha. There is an inscription on the pedestal which reads: //..h Buddhadevasya kuṭumbiniye Buddhapratī|m|ā which means: The image of Buddha (is a gift) of ..........., the housewife of Buddhadeva²⁴⁰.
Fig. No. 534: Image of *Parshvanatha* sitting in *dhyana mudra*

- **Antiquity No.** - J-77
- **Size** - 120x84x26 cm
- **Material** - Red Sandstone
- **Condition** - Damaged
- **Provenance** - *Kankali* mound, *Mathura* U.P.
- **Period** - 2nd-3rd century A.D.
- **Description** - It is the image of *Parshvanatha* sitting in *dhyana mudra*. He is protected by seven hooded *naag*.

Fig. No. 600: Pillar having varying cross-sections

Antiquity No. - J-579
Size - 86x22x18 cm
Material - Sandstone
Condition - Damaged
Period - 4th-5th century A.D.
Description - It is a pillar having varying cross-sections. At the base, it has the shape of a deformed ghata then it becomes rounded with a band in the middle and after this it becomes octagonal. The octagonal part is decorated with chain & bell motif and a band carved with half lotus. At the top of this assumes the shape of a square slab.
Fig. No. 601: Pillar with square sections and decorated with ghata pallava at the bottom

Antiquity No. - J-817
Size - 116x38x38 cm
Material - Sandstone
Condition - Damaged
Period - 4th-5th century A.D.
Description - It is a pillar with square sections and decorated with ghata pallava at the bottom & two bands of floral scrolls at the top.

255
Fig. No. 602: Figure of a square pillar

Antiquity No. - J-944  
Size - 85x31x32 cm  
Material - Sandstone  
Condition - Damaged  
Period - 4th-5th century A.D.  
Description - It is a square pillar carved with ghata at the bottom, a projecting band carved with floral scrolls at the top and another band carved with half lotus motif at the top.
Fig. No. 603: Stone umbrella made in the shape of lotus flower

Antiquity No. - J-664  
Size - 83x61x10 cm  
Material - Sandstone  
Condition - Damaged  
Period - 4th-5th century A.D.  
Description - It is a stone umbrella made in the shape of lotus flower when looked from below. There is an inscription on the umbrella and it reads:

1. ///ni[tata]. . . . si[dahath].///
2. ///. . .[ya]kace.ik[a]sy[a] v[adhu]///
3. ///[rya]. . . [ti]niya [kha]///.
Fig. No. 604: Figure of a circular canopy

Antiquity No. - J-666
Size - 146x146x11 cm
Material - Red sandstone
Condition - Damaged
Period - 4th-5th century A.D.
Description - It is a circular canopy elaborately decorated with bands of floral scrolls, lotus petals, garland placed around a lotus flower with the projecting central portions with a hole for fitting into a circular shaft.²⁵⁷
Antiquity No. - J-73  
Size - 18x12x9 cm  
Material - Red sandstone  
Condition - Damaged  
Provenance - Mathura U.P.  
Period - 4th-5th century A.D.  
Description - It is a sculptural fragment carved with the face of a lion. There is a two line inscription on the top.
### Antiquity No. - J-93
### Size - 17x17x7 cm
### Material - Sa4stone
### Condition - Damaged
### Provenance - Mathura U.P.
### Period - 4th-5th century A.D.
### Description - It is a sculptural fragment carved with the image of a male and a female holding some unidentified object in her left hand.

**Period** - 5th century A.D.  
**Description** - It is the image of Tirthankara sitting in dhyana mudra. His parikar shows a flying divine attendant and abhamandala decorated with bands of gaja nakha, beaded strings, garland, floral scrolls and sphere design.258
Fig. No. 610: Tirthankara head

**Antiquity No.** - J-150

**Size** - 25x21x16 cm

**Material** - Red sandstone

**Condition** - Damaged

**Period** - 5th century A.D.

**Description** - It is a Tirthankara head (?) with curly hair.
Fig. No. 611: Tirthankara head

Antiquity No. - J-169  
Size - 29x35x18 cm  
Material - Red sandstone  
Condition - Damaged  
Period - 5th century A.D.  
Description - It is a Tirthankara head (?) with curly hair. There is symbol of Urna in the middle of the forehead.
Antiquity No. - J-213
Size - 16x11x12 cm
Material - Sandstone
Condition - Damaged
Period - 5th century A.D.
Description - It is a Tirthankara head (?) with curly hair.
Antiquity No. - J-87
Size - 35x25x7 cm
Material - Sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 5th century A.D.
Description - It is the abhamandala of a tirthankara (?) decorated with gaja nakha, beaded string, thick garland, floral scrolls, beaded strings and lotus flower.
Fig. No. 614: Figure of a pillar

Antiquity No. - J-563  
Size - 119x21x21 cm  
Material - Red sandstone  
Condition - Damaged  
Provenance - Mathura U.P.  
Period - 5th century A.D.  
Description - It is a pillar having square cross-section in the lower-half portion. This portion is decorated with a ghata-pallava motif, river goddess Yamuna, a band decorated with floral motif and half-lotus flower. Octagonal part is decorated with a band carved with kirtimukha motif and a band of half-lotus flower. Above this is the circular part decorated with lotus petal motif. At the top exists ghata pallava placed on inverted lotus and carrying a block carved with kirtimukha design on all four sides.259
Fig. No. 615: Broken image of Balrama

Antiquity No. - J-89
Size - 49x38x11 cm
Material - Red sandstone
Condition - Damaged
Period - 5th century A.D.
Description - It is the broken image of Balrama protected by a snake, standing on right side in attendance of Neminatha whose figure has faded out²⁶⁰.
Fig. No. 616: Lalatabimba of a door showing Lakulisha sitting in vyakhyan mudra

Antiquity No. - J-550
Size - 29x37x12 cm
Material - Sandstone
Condition - Damaged
Period - 5th century A.D.
Description - It is the lalatabimba of a door showing Lakulisha sitting in vyakhyan mudra bearing a yogapatta. His club is shaped like a penis. It is decorated with two horizontal bands of flower and lotus petal motifs.\textsuperscript{261}
Fig. No. 617: Figure of an obese man

Antiquity No. - J-919
Size - 19x25x17 cm
Material - Sandstone
Condition - Damaged
Period - 5th century A.D.
Description - It is an obese male (Garuna?) having a round belly and carrying a female on his shoulders. He is wearing an Ekavali.
Fig. No. 618: Head of Shiva

Antiquity No. - J-683
Size - 36x37x13 cm
Material - Sandstone
Condition - Damaged
Period - 5th-6th century A.D.
Description - It is a sculptural fragment showing the head of Shiva. Above his head is the chest and hands of another divine figure.262.
6th century A.D.

Fig. No. 619: Mutilated image of a Jina standing in kayotsarga mudra

Antiquity No. - J-82
Size - 120x70x22 cm
Material - Red sandstone
Condition - Damaged
Provenance - Kankali Tila, Mathura U.P.
Period - 6th century A.D.
Description - It is a sculptural fragment showing the mutilated image of a Jina standing in kayotsarga mudra accompanied by a dhoti clad devotee wearing four string long har and serpent shaped keyura263.
Antiquity No. - J-644
Size - 29x26x12 cm
Material - Red sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 6th century A.D.
Description - It is a sculptural fragment carved with the image of *gaja makara*²⁶⁴.
Fig. No. 621: Headless image of a Jina standing in kayotsarga mudra

Antiquity No. - J-83
Size - 90x61x22 cm
Material - Red sandstone
Condition - Damaged
Provenance - Kankali mound, Mathura U.P.
Period - 6th-7th century A.D.
Description - It is the headless image of a Jina standing in kayotsarga mudra accompanied by a divine attendant mounted on a bracket situated on his right.265.
Fig. No. 622: Torso of a Tirthankara standing in kayotsarga mudra

Antiquity No.  -  J-80
Size  -  58x36x22 cm
Material -  Red sandstone
Condition -  Damaged
Provenance -  Kankali Tila, Mathura U.P.
Period -  6th-7th century A.D.
Description -  It is the torso of a Tirthankara standing in kayotsarga mudra.
7th century A.D.

Fig. No. 623: Tirthankara head

Antiquity No. - J-870  
Size - 7x6x6 cm  
Material - Sandstone  
Condition - Damaged  
Period - 7th century A.D.  
Description - It is a Tirthankara head (?) with curly hair\(^{26}\)
Fig. No. 624: Figure of a mother with a child

Antiquity No. - J-874
Size - 29x17x8 cm
Material - Sandstone
Condition - Damaged
Period - 7th century A.D.
Description - It is a sculptural fragment showing mother with a child. A maladhari vidyadhara is visible on upper left side.

\[\text{maladhari vidyadhara}\]
Fig. No. 625: Lower part of the image of Tirthankara sitting in dhyana mudra

Antiquity No. - J-803
Size - 18x25x13 cm
Material - Sandstone
Condition - Damaged
Period - 7th-8th century A.D.
Description - It is the lower part of the image of Tirthankara sitting in dhyana mudra on a cushion kept over a pedestal carved with two devotees. The pedestal bears a two line inscription.268
Fig. No. 626: Headless mutilated image of Tirthankara sitting in dhyana mudra

Antiquity No. - J-804
Size - 34x49x24 cm
Material - Sandstone
Condition - Damaged
Period - 7th-8th century A.D.
Description - It is the headless mutilated image of Tirthankara sitting in dhyana mudra on a cushion.
Antiquity No. - J-914
Size - 46x44x30 cm
Material - Sandstone
Condition - Damaged
Period - 7th-8th century A.D.
Description - It is a sculptural fragment carved with chandrashala motif having outline of a beaded string on a plain band and miniature bracketed square pillars.

Fig. No. 627: Sculptural fragment carved with chandrashala motif
Fig. No. 628: Figure of chandrashala motif housing Shiva head

Antiquity No. - J-917
Size - 30x55x25 cm
Material - Sandstone
Condition - Damaged
Period - 7th-8th century A.D.
Description - It is a chandrashala motif housing Shiva head.
8th century A.D.

![Image of Rishabhanatha sitting in dhyana mudra on a siṁhāsana](image)

**Antiquity No.** - J-66.59  
**Size** - 89x68x24 cm  
**Material** - Red sandstone  
**Condition** - Damaged  
**Provenance** - Mathura U.P.  
**Period** - 8th century A.D.  
**Description** - It is the image of Rishabhanatha sitting in *dhyana mudra* on a *siṁhāsana*. *Siṁhāsana* is flanked by his *yaksha* on the right side. A diminutive bull is carved in front of the wheel. His *parikar* contains *Indra & Upendra*, 24 *tirthankaras* sitting in *dhyana mudra*, two elephants each with two riders, *trichhatra, abhamandala* in the shape of circular band and *deva dundubhi*. 
Fig. No. 630: Lower part of the image of Tirthankara sitting in dhyana mudra

Antiquity No. - J-788
Size - 27x31x18 cm
Material - Sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 8th century A.D.
Description - It is the lower part of the image of Tirthankara sitting in dhyana mudra on a simhāsana.
Fig. No. 631: Head of Parvati

Antiquity No. - J-217
Size - 13x8x9 cm
Material - Sandstone
Condition - Damaged
Period - 8th century A.D.
Description - It is the Parvati head (?). She is wearing a very tall jatamukuta.
Fig. No. 632: Figure of a mother goddess holding a child

**Antiquity No.** - J-797
**Size** - 41x26x14 cm
**Material** - Sandstone
**Condition** - Damaged
**Period** - 8th century A.D.
**Description** - It is the figure of a mother goddess holding a child. The mother goddess wears a large bun of hair, very large ear ornaments, *graiveyaka, stanhar* with a large pendant and bangles.270

Material - Sandstone
Condition - Damaged
Period - 8th century A.D.
Description - It is a Chakra held by Vishnu (?)²⁷¹.
8th-9th century A.D.

![Image of broken Tirthankara Chaubisi patta showing Rishabhanatha]

Fig. No. 637: Broken Tirthankara Chaubisi patta showing Rishabhanatha

![Image of inscription on the pedestal]

Fig. No. 638: Inscription on the pedestal of the image

Antiquity No. - J-57
Size - 96x49x34 cm
Material - Red sandstone
Condition - Damaged
Provenance - Kankali mound, Mathura U.P.
Period - 8th-9th century A.D.
Description - It is a broken Tirthankara Chaubisi patta showing Rishabhanatha with his hair falling down on his shoulder. He is sitting in dhyana mudra. He is located in the center and 23 Tirthankaras are visible in his parikar. There is an inscription on the pedestal which is unfortunately very imperfect. It includes the word 'pratima' i.e. image. The slab was discovered during 1889-90²⁷².
Fig. No. 639: Headless image of Rishabhanatha

Antiquity No. - J-78  
Size - 80x80x23 cm  
Material - Red sandstone  
Condition - Damaged  
Provenance - Kankali mound, Mathura U.P.  
Period - 8th-9th century A.D.  
Description - It is the headless image of Rishabhanatha. This sculpture was found in February, 1890. There are traces of an inscription inscribed on the pedestal of the image. The simhasana is carved with Dharmchakra flanked by a devotee and a lion on both sides. The presence of the two diminutive bulls between the lions in front of devotees indicate that the image is of Rishabhanatha. Simhasana is flanked by Yaksha and Yakshi of Tirthankara. The parikar is carved with Indra, Upendra, two females, two chauri bearers and two diminutive tirthankaras.

Fig. No. 821: Image of Bodhisattva sitting on a pedestal

Antiquity No. - B-18
Size - 64x83x40 cm
Material - Red sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is the image of Bodhisattva sitting on a pedestal. Two human figures are carved on the pedestal. There is one line inscription on the top of the pedestal which reads as: 

```
[va]ršāmāse 2
```

It means in the 2nd month of the rainy season, on the 6th day........Bodhisattva was set up by …na…334.
Fig. No. 822: Pillar carved with the image of Bodhisattva

Antiquity No. - B-83
Size - 89x23x18 cm
Material - Red sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is a pillar carved with the image of Bodhisattva in standing posture and protected by an umbrella. He is wearing a double graiveyaka and his right hand is raised. His left hand is holding the folds of his lower garment.
Antiquity No. - B-147
Size - 49x72x16 cm
Material - Red sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is the *lalatabimba* decorated with three bands. The top band is carved with acanthus leaves and half-flower motif. The middle band is carved with floral designs and human figures holding a flower & peeping from balconies having winged lion and truncated pyramid capitals. The third band is decorated with L shaped band on the right side, a square niche filled by lotus flower & lotus petal motif and a row of five men standing & holding large lotus flowers in their right hand. They are wearing a long tunic and *pajama*. The space below the line of standing human being is decorated with lotus flower and a thick garland. It is very much like *pushpashakha* of later times.
Antiquity No. - B-182
Size - 31x80x11 cm
Material - Red sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 1st-2nd century A.D.
Description - It is a lalatabimba decorated with three bands. The top band consists of leaf motif and palm tree design. The middle band is decorated with flowering creeper motif. It is bent in U shape on the left side. The U shape continues in bottom bands and contained two niches decorated with flower motifs. On the right side, the images of various Buddhas & Bodhisattvas in different postures have been carved. Their abhamandalas consists of circular bands. The outermost band is decorated with gaja nakha designs. A devotee is carved on the extreme left side. He is kneeling with folded hands. He wears bangles, har and earrings. Buddha images wear kopina. Bodhisattva wears a har, graiveyaka bangles and earrings.

Fig. No. 908: Figure of top of the door shaped like an arch

**Antiquity No.** - B-207  
**Size** - 33x68x5 cm  
**Material** - Red sandstone  
**Condition** - Damaged  
**Provenance** - Mathura U.P.  
**Period** - 1st-2nd century A.D.  
**Description** - It is the top of the door shaped like an arch. The three curved segments depict the scenes of a *stupa* being worshipped by people, an *arahat* being worshipped by devotees and a female goddess being worshipped by devotees as we move from top to bottom. The narrow ends of the arches show crocodiles with open mouth. The top left and right corners having triangular shape show *maladhari vidyadhara* and a flying celestial being.

Description - It is a sculptural fragment carved the figure of a male dancer.
Fig. No. 965: Head of Bodhisattva

Antiquity No. - B-25
Size - 44x28x36 cm
Material - Red sandstone
Condition - Damaged
Provenance - Mathura U.P.
Period - 4th century A.D.
Description - It is the head of Bodhisattva wearing highly decorated turban\(^{354}\).
Fig. No. 966: Figure of a miniature *stupa*

**Antiquity No. -** B-116  
**Size -** 54x23x23 cm  
**Material -** Red sandstone  
**Condition -** Damaged  
**Provenance -** Mathura U.P.  
**Period -** 4th century A.D.  
**Description -** It is a miniature *stupa* having square base, round middle part and circular upper part. Lower and middle portions have the images of *Buddha* in different postures. The lowest part shows *Buddha* in standing posture and attended by his devotees kneeling near his feet. The image is flanked by plain pillar and the upper part is decorated with lotus flower. The pillars support a barrel vaulted roof. The middle portion has *Buddha* sitting in different postures housed inside simple pillars supporting *chandrashalas* in cardinal directions. The remaining corners also have the images of *Buddha* in *dhyana mudra*. A barrel vaulted roof above his head support a balcony at the first storey level. This is surprisingly similar to *Shivalingas* having three parts of similar designs. The *Shivalinga* before this are made in naturalistic style with human images of *Shiva* carved on the natural phallus.

Antiquity No. - G-262  
Size - 23x25x12 cm  
Material - Schist stone  
Condition - Damaged  
Provenance - Gandhar  
Period - 3rd century A.D.  
Description - It is the square capital of a pillar. One tier is decorated with lotus petals supported by tapering brackets. The lower three tiers are decorated with beaded strings when seen from below. There is a round hole in the middle. 

304
Fig. No. 1100: Bust of a Greek God

Antiquity No. - B-230
Size - 20x23x10 cm
Material - Schist stone
Condition - Damaged
Provenance - Gandhar
Period - 3rd century A.D.
Description - It is the bust of a winged Greek god.305
Fig. No. 1101: Mutilated figure of Buddha

Antiquity No. - O-281
Size - 38x68x15 cm
Material - Schist stone
Condition - Damaged
Provenance - Gandhar
Period - 3rd century A.D.
Description - It is the mutilated figure of Buddha sitting and delivering sermon.¹⁹⁶
Fig. No. 1102: Broken figure of Maitreya

Antiquity No. - O-284  
Size - 78x22x15 cm  
Material - Schist stone  
Condition - Damaged  
Provenance - Gandhar  
Period - 3rd century A.D.  
Description - It is the broken figure of Maitreya wearing graiveyaka, hara, bandolier, kundal and lower & upper garments. He has ुष्णी (Usnisha) at the top of his head.

Antiquity No. - O-285  
Size - 52x36x12 cm  
Material - Schist stone  
Condition - Damaged  
Provenance - Gandhar  
Period - 3rd century A.D.  
Description - It is the broken image of Maitreya. He is wearing Uttariya, graiveyaka, hara, another hara going around his right hand, bandolier, kundal and headgear. There is a plain circular abhamandala behind his head.398.
Fig. No. 1104: Figure of a panel showing a dwarf

Antiquity No. - 47.103
Size - 13x24x3 cm
Material - Schist stone
Condition - Damaged
Provenance - Gandhar
Period - 3rd century A.D.
Description - It is panel showing a dwarf holding a giant grape creeper. Another dwarf is picking grape on the left side.
Fig. No. 1105: Head of Buddha with curly hair

Ideas on Heroism in Medieval South India – Through Epigraphy

Dr. S. Chandni Bi
Associate Professor
Centre of Advanced Study
Department of History
Aligarh Muslim University
Aligarh- 202002.

The concept of heroism has always been esteemed by people from the beginning. This was also a major pre-requisite identity of leadership. Physical and mental strength went hand in hand to achieve something extraordinary and to be a center of attraction. The heroism appears to be a sort of special way of exhibiting valour with an iota of selflessness and for the welfare of the larger society. Thus we may conclude that heroism is a character that involved certain amount of willingness to conduct an act of abnormality with a combination of physical and mental strength towards a common goodness without minding the loss of one’s own precious things like parts of body, time and taking pains for the comfort of others and sacrificing even life.

The availability of a number of memorial stones right from the earliest phase of south Indian historical period, the Sangam age (300B.C to 300A.D) till the end of Vijayanagar Period, at least till 17th century serve as a major source for us to know about the dead heroes. A vivid description of the memorial stones from both the literary and archaeological sources would provide the required background for the better understanding of the theme in the medieval period in particular in the southern part of the peninsular India.

The men who fought battles for saving their native land by sacrificing their precious lives were considered as heroes to be remembered in the age of Sangam. Apart from that there was another major act considered to be an act of heroism, it was saving the cattle from the hands of cattle lifters. There have been a number of references in the whole of Sangam literature which explains about the memorial stones dedicated to the cattle saving heroes from the hands of cattle lifters\(^1\). The enigmatic problem here is that cattle lifting was prevalent in this age\(^2\). The cattle being backbone of the agricultural
economy their lifting was either theoretically or practically associated with a feud or battle at a smaller or bigger level. Thus it appears that saving the cattle was a heroic action where men sacrificed their lives. The cattle lifting was seen as a precedent to war therefore every cattle saver was considered with a warrior who engaged in the battle fought against his motherland. But the underlying fact is that loosing life for the public cause for either saving cattle or saving land was regarded as an act of heroism and revered and remembered by the people. That may be the reason for the literature of the time to speak in such high words about these acts. In those times, heroism was equated with losing life to save cattle and/or motherland.

There is another single incident mentioned in the Sangam literature. It’s all about a Chola king, Koperun Cholan who renounced his life and faced death voluntarily. The Sangam literature tells us the reason for the same as two of his sons wanted to become rulers and rose against the ruling father king. Though the king prepared to face the sons in the battle field he was stopped and advised by the well-wishing poet friends that he would not be happy in both the cases of either loosing or winning in the battle against his own sons. then he decided not to fight. He withdrew himself and crowned them as their wish and he renounced the worldly life.

He preferred an open space out of the city and the place was cleared, fresh sand was spread first and then fresh green grass on it. He sat there facing north direction, deserted food, continued meditation until death. This whole process is called as vadakkiruttal in the Tamil literature. This word is of two syllables vadakku+ iruttal, in which the vadakku denotes north direction and iruttal means sitting and so the term carries the meaning of sitting/facing north direction.

This king Koperun Cholan was bestowed with a memorial stone. Besides him as per the information supplied by the Sangam literature, we come to know that many poets and scholars who were his good and thick friends also followed him and underwent the practice of vadakkiruttal and to them also memorial stones called nadukal were set up. Thus except these two instances we do not get any other case of establishing hero stones.

The literature of the historical period does describe fixing of such memorial stones. On the contrary we find a large number of virakal found in many parts of the Tamil country. For that matter one may find innumerable hero stones in other parts of south India belonging to this period. It appears as if the practice of constructing hero stones for the war heroes had become a common practice of the day. This is the theme of the present paper.

A man by named Kaṭṭi son of Sēdāru died while rescuing the ewes and a memorial stone was erected for him at Sankarāpuram in Villupuram district, which was assigned a probable date in 6th century (574 A.D.). In the 9th century there was a land donation made for the purpose of dedicating hero-stones for the men who lost their lives in rescuing the ewes from the hands of the cattle lifters.
Sannakkuppam, Tk Vanniyampadi, Dt. N.Arcot) (Fig. 1). In 10th century a father and a son died in the process of rescuing ewes from the thieves and a memorial-stone was established for the duo (Fig. 2), which is presently available in a private mango grove (V – Vankalur- Dt.N.Arcot) in Tamilnadu.

An inscription in Brammalingēeswarar Temple of Kokkarayān Pēttai Village (Tiruchengodu – T.K. Salem Dt.) says that a hunter by profession named Karaya Vēttuvan received a land donation, from the sabha (administrative body) of the village for rescuing the ewes from the hands of the enemies in eleventh century. A hero stone was dedicated to a washer man of 1010 A.D. for having saved the buffalos and Uttama Nidhi Chittira Mēllip periyāttān also enjoyed the benefit of having a hero-stone for the same heroic deed.

These are some of the examples of hero-stones to demonstrate that from Pallava Chola period to early medieval times hero stones were dedicated to warriors who protected cattle. Thus the availability of hero-stones makes clear that the practice which was mentioned in Sangam literature was followed in the society for centuries after too and the same act of safeguarding the cattle was considered to be an act of heroism and the brave ones who lost their lives in such feuds were remembered as heroes and the memorial stones were erected for them. Thus we notice that the idea of considering a cattle saver as a hero continued well throughout the medieval period perhaps due to the practice of agricultural economy and the extensive use of cattle in the field of agriculture.
The wars resulted from the lust of kings and emperors for territory. The rulers were seen as war mongers. They ranged from petty chieftains to the emperors. The two global wars of the twentieth century have brought an abrupt end to large scale wars for territories but these still continue for power and resources in different forms. Glorification of heroism ensured perpetual supply of warriors to the ruling class. This idea was better conceived in the middle ages when wars were the order of the day in India and elsewhere of the globe. They lost their lives in the wars. When the hero stones were constructed for them, the inscription part of it mentioned the heroic deed like killing the horse and the soldier, burning the village etc.

From the Pallava period onwards we find much elaborated inscription written on the memorial stones. These provide historic information like the parties and persons involved in the feuds, year of the king’s rule etc. and that enable us to find out the details from these. A brave man Kuma of Kōvalur, died at a war with Kōsar and Malavar, who came with a huge army and invaded the village tells the inscription on the memorial stone. The memorial stone is dated in 7th century. Another man of same village also died in a war after burning a village named Kaikkūr. Vaniga Vanila Varayar, killed two horses and the warriors on the horse and also died, when the army of Kaduvetti attacked Alagur in 9th century10.

When Araiyan Ayiravan defended his land, his father Sadaya Maran came to help him but unfortunately the father also fall dead and a hero-stone next to his son’s was erected for him by some Eka Vira Muttirayan. Melur Adan died in a war against the king of Mekonrai Nadu11. Vakkadi, son of Marigap Pavakkilar also died in the battle field in the same war during the rule of Pallava Nandivarman II.

Thus it is ascertained that memorial stones were constructed, for the heroes who lost their lives in saving their motherland from the hands of the enemies and in the inscriptions their idea of patriotic deeds is highlighted. Their participation in the battle for saving land, life and cattle wealth and their subsequent death was sufficient criteria to erect a memorial stone for them. This practice of constructing of a hero-stone transcended caste and creed. The above said examples are sufficient to exhibit the idea all patriots were given hero stones and patriotism was synonym of heroism in the minds of the common public of medieval period. This practice continues even today in many different ways. The war memorials of different nations around the globe in the twenty first century reinforce this idea. The discovery of memorial-stones reveals how the oldest idea persisted and continued in varied new ways. Thus the territorial lust was looked upon as characteristic of a ruler. It appears to be a continuation of an old idea that did exist in the Sangam age. In one of the sangam age poems a woman lists her wishes when praying to a dead hero of her family standing in front of a memorial stone. One among her wishes is that the king of her region should be blessed with enemy rulers so he had opportunity for many battles12.
Extending a helping hand to the needy in a crucial situation is becoming a rare character in the present society. But the early and medieval south Indian society was different is the revelation from the hero stones.

Anti-social elements like thieves, robbers and women abductors lived even in the middle ages. The medieval society was also filled with such crimes perhaps less in number when compared to the present society. Hero stones are the only source which reveal this fact. The men who lost their lives in resisting such criminal acts were glorified by the erection of memorial stones.

One Punnga lost his life while fighting with the thieves. His son in law erected the memory stone\textsuperscript{13}. He hailed from Navali village of Dharmapuri district. Vira Nolamba, the feudatory of Pallavas was the ruler then. This inscription is written in Kannada.

Another hero stone which is lying in a tank in the Chengalput area\textsuperscript{14} is engraved in Tamil language. The characters of the inscription roughly suggest a period of 10th century A.D. The inscription is engraved around the memorial stone of the hero. It records the death of Kavarai Mayietti Kamban, in defense of some women who were molested. A goldsmith Sa(r)banchari who fell in a fight with the thieves at Kolle\textsuperscript{15} 18 for him a memorial stone was raised. This is from Karnataka region.

Another hero stone from Anantapur\textsuperscript{16} says, Perumale son of Gangoja of K. Samandaru fought with the thieves in the hill pass in which “kings had fallen” and without being robbed, he died as a hero. This belongs to 1255 A.D. from the village Kanchi Samundaram. Keta, son in law of Nagichetty,
was pierced to death by thieves, while he was escorting his wives to a distant village. The memorial stone was consequently set up by his mother Kan-Kabbe\textsuperscript{17}.

There is one \textit{Nadukal} in Changalput District in Kakattur village\textsuperscript{18} stating that Kaliviriya Muttarayan, a Valluvan of Kakattur lost his life while fighting against thieves (\textit{Kallar}) on behalf of the perumakkal (big people) meaning men of some eminence of the village. These men had made a land grant as \textit{Kalli(u)patti}, to his son. The stone also contains the sculpture of the dead hero.

Thus the above examples explain how people either for individuals or for the cause of the village resisted the anti-social elements and memorial stones were erected for their meritorious acts and they were remembered by the society. Thus it is clear that the society did have a large number of selfless people who volunteered for the rescue of the unfortunate victims and sacrificed their own precious lives in the act. The community duly recognized their sacrifice.

Wild animals do cross their forest limits and get into country side for food. The trespassing of wild animals into the human habitats in the modern era is not a new phenomenon. The ancient frontier villages bordering forests faced the problem of wild animals like tiger, leopard and elephants entering the inhabited area. On such occasions the men hunted the wild animals. Most of the time they were successful in killing the animal but sometimes some of them lost their life. Memorial stones was dedicated to them also.

In my home town Salem, in the Trichy main road, near Oriental talkies, the area east of the road is named as ‘Puli-Kutta\textsuperscript{1}', a Tamil word with 2 syllables, ‘puli’ meaning tiger and Kutthi or Kutthu is to kill or pierce. So the place name indicates that the area got its name from some hero who killed a tiger in the past. When author searched for hero stones in my field work, I came across a hero-stone showing a man fighting with a tiger fixed on the western side of the road. This stone stands on the main road with 1/4th portion above the ground.

The Salem museum has a collection of number of hero stones which depict the men fighting with the tigers. These hero stones do not carry any inscriptions. So we do not know the date of the hero stone. But from the other details like hairstyle it can be suggested that they may belong to the medieval times especially of Nayaks’ time in south India. Thus this deed was also a heroic deed in the time period of our study in south India. The selfless souls who dedicated their lives for the cause of other members of their society were revered and remembered by them through erecting the memorial stones.
The pages of history do reveal the fact that though man began to deviate from natural habitat and began to settle in manmade rural and urban spaces still preserved a corner of heart to pet animals. Of course that also contained a hidden agenda of selfishness. The domesticated animals did play a major role till the modern times in many walks of human life which has not ended even in this age. One may perceive that the complete separation of animals from human species is almost impossible. But how grateful we are is a different issue. We know how some fellow members of our society do drive them off when thereof no use. But in ancient period, the society did acknowledge their services. But the sincerity and loyalty of pet animals was also remembered through the erection of nadukal or memorial stone.

One pet dog named ko(r)avan died after biting a robber, and therefore a memorial stone was raised for the dog\textsuperscript{19}. A few such Nadukals were discovered by author. One such memorial dedicated to a cock with a pet name of ‘Pon kotthi’ came to author’s notice. Perhaps it was a fighter cock who lost its life in a cock-fight\textsuperscript{20}.

Self-immolation which is a punishable offence according to the present Indian penal code was considered as an act of heroism in Tamil tradition. It shows how the perception of a society changes
with time. This activity which was considered as an act of great valour and heroism to be remembered and revered by the whole society in the medieval times got changed in the modern world as an act of crime. People committed suicide for various reasons throughout India especially in South India. This is evident from the study of memorial stones. We find many people committing suicide for various reasons on different occasions. One record from Darwar\(^\text{21}\) says that some Chandi, son of Sahani Mallayya burnt himself on the occasion of eclipse. The record does not mention if it was a solar eclipse or lunar eclipse. Perhaps that was considered as an auspicious day for making sacrifices. But there may be other reasons behind his self-sacrifice which our source fails to explain. This might have been an ordinary practice followed in the society. We come across many rulers of medieval times making donation to Shaiva and Vaishnava temples on the occasion of eclipse. They also took up different charitable activities on such occasions. The self-immolation on such an occasion is a rare instance. This practice has not been reported from any other part of India.

Another hero from Etesvaram, Hyderabad\(^\text{22}\) offered his head to Devi (goddess) after saluting Oderaju. Oderaju was a local chieftain. The hero saluted the king before offering himself to the mother Goddess. This is also perhaps a peculiar custom like self-immolation. Perhaps he offered his head for the cause of the chieftain. Another relief with joined hands at Chittor\(^\text{23}\) also perhaps explains the self-immolation. This stone belongs to 9th century A.D.

Another memorial stone of 10th century A.D. from Macheralal of Guntur district\(^\text{24}\) explains that Acha (Kunjuu)ndu offered his head to the mother goddess Padalasami for the cause of his master. The success of his master over a skirmish could be the reason behind his sacrifice.

Certain Kodanda knocked down his own head\(^\text{25}\). In this Veerakkal certain lady Rachamma and the hero’s wife Rajabe are mentioned. The reason for his sacrifice is not mentioned and at the same we are unable to relate Rachamme whose name has been mentioned and why his wife’s name is also given. Perhaps they might have caused the memorial stone to be erected. This stone is from Lokkanathathallu village of Coimbatore district of Tamilnadu.

Another example of self-immolation from Anantapura district of Karnataka region\(^\text{26}\) informs that the hero stone belongs to the rule of Nolambas who were the feudatories of Pallavas. Here some Gavunda jumped into fire. Such type of self-immolation was practiced largely by women. In ancient times, women self-immolated by committing Sati but it was a family affair and reflected the position of women in medieval society.
Sati was generally committed by women by jumping into fire whose husband had died. Author found large number of sati stones in her field work. Many of these carry only a raised hand symbol, which is homogeneously found throughout India. The associations of a woman or many women with a man in memorial stones are generally regarded as sati stones which do mean that the lady or ladies committed sati with the man. In this sati cult Rajasthan surpasses all other states in India.

K.A. Neelakanta Sastri, mention in his book ‘The Colas’, that there are only a few examples of sati stones available in Tamilnadu and suggests that we need not generalize this cult and it was an exception in Tamil Nadu. But author found lots of sati stones in her field work, in Dharmapuri, Krishnagiri, Salem, Rasipuram and Namakkal districts. They are simply engraved with raised hands and some time the female figure is also engraved.

In certain areas of Salem and other above mentioned areas, the sati stones have been adopted by temples and are worshiped as minor deities with different names like Angaala Amman, and Puvaadai Kari. There are separate and small temples built with the sati stones representing the deities. Teepainthaal Amman is another deity who is worshiped in many places to this day. The very name Theepaynthaaal in Tamil means the lady, one who jumped into the fire. This deity’s temple is prevalent in many places in Tamilnadu. The memorial stones established for the women who scarified their life by committing sati are generally called as Satikal and Mahasatikal or Mastikkal.
Navagandam: Another type of self-immolation called *Navagandam* is also found in the medieval south India committed by men only. *Navagandam* is a Tamil term denoting nine parts. The body is cut into nine parts and offered to goddess Kali or Korraavai as referred in Tamil literature in which as a final step head is offered\(^{28}\). Such people who offered their head were glorified by raising memorial stones. Such stones have been identified by the author in Salem and Rasipuram areas. They are available in other places, for example in Chengelput, Mayiladuthurai, Pullamangai etc.

This type of head offering has been referred in the post Sangam Age tamil literary work Silappathikaram. When this epic\(^{29}\) refers to Indira’s festival in the city of Puhar, it also refers to the soldiers who gained victory in the wars offered their head to the God who safeguards the city, as a part of festival ceremony. The soldiers generally who prayed for their success offered their heads to Goddess Korraavai, who is generally celebrated as God of victory. Another group of people called Eyenar offered their heads after their victory at the war. To show their gratitude towards God for having given them success they cut their heads and offered the blood that bubbled out and prayed to Korraavai that she should accept the blood as their offering\(^{30}\).

The literature gives the details of the process of how the offering was made. The Maravas, a class of warriors who got prepared to this offering selected a lady as representing Goddess Korraavai\(^{31}\). This lady is made to sit on a deer. Many scents like, sandal and a mixture of good smelling powders, balls made of gingili seeds mixed and pounded with jaggery, rice mixed with some fat, flowers known for their sweet fragrance were offered to her and she was worshiped. Then this *bali* (sacrifice) of head offering was done. During that time drums and pipes were sounded. This sort of offering is called a *Bali* meaning sacrifice. A stone slab that lay before the goddess was called as *bali peet* and the soldiers first touched and worshiped the *bali peet* and then the goddess, and finally their heads were offered\(^{32}\).

This sort of head offering or human sacrifice was practiced even in latter ages. The sculptures showing head offering, symbolically represented with a sword on neck from backside, holding with both the hands could be seen in the cave temples of Mamallapuram, Singavaram and Thrichi\(^{33}\). The
temple sculptures of Mayiladutturai, Pullamangai and Punjai indicate the continuation of the same practice even in Chola times.

There is a literary evidence too that prove the existence of this practice in Chole times. When Kulollunga I (1020-1070 A.D) ruled in eleventh century, epic ‘Kalingattuparani’ was composed by poet Jayankondar, to portray his valor and success in attacking and annexing the famous Kalinga. It describes the human sacrifice as follows: the head was cut with its knot on the top and placed on the altar, there were maid servants to the goddess ‘Kali’ called ‘Yogini ladies’ they lifted the cut heads on left hand and the sword on right hand and offered to the deity. This type of offering was referred as Navagandam. Such offerings were made as a mark of thanksgiving for the success in war and king’s good health.

The practice of such offerings and the creation of memorial stones for this type of sacrifice seemed to have increased in the medieval times. Separate sculptures of 2 to 3 feet holding a sword beneath the head are seen in many places. There are four different types of such head offering statues that are found in south India. The following description may help to frame an idea of them to some extent:

(1). The man would be in standing posture holding his tuft with left hand and sword beneath the head with right hand. (Example – Manimangalam).

(2). The hero is holding the sword beneath the head in left hand and holding another sword facing towards the ground on the right hand. (ex. Manimangalam, Kunrattur and Tiruverkadu).

(3) The standing hero holding the two ends of the sword with two hands beneath his head (Rasipuram).

(4) Left hand holding the departed head with its tuft and right hand holding the sword upright, with right leg little forward and left leg at the backside. (ex. Kovur, Nasarathpettai and Perambur).

These memorial stones are found inside the temples, just in front of goddess Durga mostly but in some places they are found even on road sides. Thus the navagandam memorial stones could be found with different postures. With regard to inscriptions we find some mentioning the human sacrifice only with no engravings. We find no inscriptions on the memorial stones with the sculptures on them which are found in open space. The memorial stones that are found in the temple premises and are being worshipped could not be examined.
There are three different terms that we come across the custom of land donation to the so called Heroes of the medieval times. *Uthirapatti, Kallu patti* and *Niiththaar patti*. In these tamil wors, *patti* denotes the land donation. *Uthiram* means blood, *kallu* is stone and *niiththar* means the dead one. These terms are denote the land grants made by the administrative bodies as a gratification to the heroes who lost their lives, to their grieved family members to establish memorial stones for the dead. Thus we see a different concept of heroism ideas of medieval south India. Thus, we can see the way the idea of heroism expanded in the medieval ages. In the modern age, the concept of heroism is still changing.

Introduction

The Visnu is one of the three supreme deities (Trimurti) of Hinduism. It is conceived as “the Preserver or the Protector” within the Hindu trinity\(^1\). The sculptural representation of the deity is governed by specific iconographic rules and has specific attributes\(^2\). He has four arms which indicate his all-powerful and all-pervasive nature. His physical existence is represented by the two arms in the front and the two arms at the back. The crown adorning his head symbolizes his supreme authority. The earrings represent the inherent opposites in creation – knowledge and ignorance, happiness and unhappiness, pleasure and pain. He rests on Ananta, the infinite snake. It is depicted holding four attributes. A conch shell or Shankha called Panchajanya representing his power to create and uphold the order of the universe. The conch symbolises that Visnu is the primeval Divine sound of creation and continuity. The Chakra or sharp spinning weapon like the discus named Sudarshana symbolizes purity of mind. The mace or Gada named Kaumodaki represents the power of the Divine strength to destroy demonic tendencies\(^3\). The lotus or the Padma represents spiritual liberation and divine perfection. The full bloomed lotus signifies awakened state of spiritual consciousness.

Geographical-Cultural Subregional Context of Dakshin Radha: We found two sculptural specimens of Visnu from Hirapani and Lakhkannath in West Medinipur district which falls under geographical-cultural sub-region of Dakshin Radha. The sub-region of Radha is lying to the west of the Bhagirathi in western Bengal. With the course of time, politically it was divided into three administrative divisions. Those are Varudhamana Bhukti, Kankagrama bhukti and Danda bhukti. The Jayarampur copper plate inscription of Gopacandra dated 6\(^{th}\) century CE found from Balasore district of Orissa, records the grant of Svetavalika grama within Dandabhukti by Mahasamanta Achyuta for a Buddhist Vihara built by him. It is a combined deed of sale and grant\(^4\). The Midnapore copper
plates of Sasanka found from the village Antla in the present Dantan Police Station in West Medinipur district, mentions Dandabhukti mandala with Utkala. The two plates dated in the first half of 7th century CE were issued from the adhikarana stationed at Tavira. The first plate records the grant at a potters’ village named kumbhara padraka in Ketakapadrika uddesa in Dandabhukti by Mahapratihara Subhakirtti, the provincial governor. The second plate records the land grant in the mahakumbhara padraka village in Danda bhukti attached to Utkala desa. The Irda copper plate of the Kamboja king Nayapaladeva is palaeographically dated late 10th century CE. The plate belonged to a zamindar of Irda in the Balasore district of Orissa. The Tirumalai Rock Inscription of Rajendrachola states that as a separate kingdom, Dakshin Radha was ruled by a Ranasura in Vangala desa and Dandabhukti or Tandabutti was within Uttiraladam. The epigraphic text describes the beauty and abundance of the landscape of this region while narrating the conquest of Rajendra Chola. It says that Vangala desa was such a place where rain & wind never stopped. The gardens of Tandabutti had been full of bees and Uttiraladam was as rich in pearls as the ocean. The Ganga, whose water dashed against bathing places or pilgrims covered with sand. The poetic fervour of this section of the epigraphic text is complementary to the narrative of Digvijaya of the king. It fulfills the purpose of representing the power of king for the reception of the courtly elite. In 10th-11th century CE Dandabhukti did not remain bhukti or province but it became mandala or district under Vardhamana bhukti. That indicates the expansion of settlements in Radha which incorporated Dandabhukti mandala within its administrative unit. The region around Dantan is geo-politically and culturally contiguous to coastal region of Balasore in Orissa.

**Visnu of Hirapani village, Narayangarh, West Medinipur:** Hirapani village is under Narayangarh P.S. The sculptural specimen is identified as Vishnu (Fig. 1). The specimen measures 130 X 67 cm. The specimen is worshipped in the name of Gramchandi by Munda, lodha, Orao, Bagdi, Bhunija, Kayastha as informed by the local villager Pintu Sinha. The specimen is identified as Visnu Janardana according to Rupamandana. It is identified according to the order of arrangement of the emblems starts from the lower (major) right hand and moves in a clockwise direction ending with the lower (major) left hand. “In contrast to the experimentation with various caturvimsati-murti forms of Visnu throughout the eighth and ninth century, beginning in the tenth century the overwhelming majority of Visnu images correspond in ayudha alignment to his Janardana form”. The name Janardana means “giver of rewards”. The specimen is carved on a rectangular back slab. There are two flying celestial beings on the top of the back slab. The Prabhamandala or the halo is not ornamented. The specimen wears ornamented high crown or kirita-mukuta. The Shreevatsa mark on his bare chest symbolizes his consort Lakshmi. He wears auspicious “Kaustubha” jewel around his neck and a garland or Vanamala. The diaphanous uttariya or the upper garment is worn with upaviti and the short antariya or the lower garment is held by a girdle fastened at the centre with a clasp and the loose end falls straight down between the legs. The Visnu stands in sthanaka pose on the full bloomed lotus on the recessed pedestal. The Visnu is flanked by Sri and Bhu holding full bloomed lotus and bud respectively. The consorts stand on the pedestal in slightly relaxed posture. The
specimen has stylistic affinity with the specimens of Mukhalingam, Madhukesvara temple dated 10th century CE. The date of the image is assigned to 1000-1100 CE.

Fig. No. 1: Visnu of Hirapani

The Visnu of Lakkannath: The Visnu specimen of Lakkannath was found from Lakkannath palace temple. It measures 100 x 60 cm. The Visnu (Fig. 2) is carved against the rectangular back slab. The halo is designed with incised circular lines framing the head adorned with the ornate kirita-mukuta. It is also a specimen of Janardana Visnu according to Rupamandana. The Visnu stands on the triratha pedestal in sthanaka pose. Visnu is flanked with Sri devi and Bhudevi. Both of them have unembellished halo. The pedestal is carved with the devotees with folded hands in Anjali mudra. The Sridevi and Bhudevi are slightly bent towards the central deity Visnu. The Kundala or the ear stud
of Visnu is striking. The sculptural specimen has similarities with Kalinga style, and the above mentioned specimen of Hirapani. This specimen of Visnu is dated c. tenth to eleventh century CE.

**Fig. No. 2: Visnu of Lakkhannath**

**Conclusion:** Both of the specimens of Visnu were not found in situ. The find spots of the specimens are in West Medinipur district of West Bengal along the river of the Suvarnarekha. Both of the specimens are dated tentatively late 10th century C.E and show stylistic similarities with Kalinga region. The find-spots are contiguous to coastal region of Daksin Radha which was geo-politically and culturally contiguous to Utkala desa.

**Acknowledgement:** I express my sincere gratitude to Dr. Elora Tribedy for her valuable comments and Mausumi Mukherjee, Sanjay Das, Pintu Sinha and the local villagers for bringing the sculptural specimens to my notice.

Some Mughal Monuments at Ajmer, Rajasthan: A Study in Medieval Archaeology

PROF. M. K. PUNDIR
Centre of Advanced Study
Department of History
Aligarh Muslim University
Aligarh-202002, India
mkpundhir@gmail.com

The credit to establish all India Empire during the medieval period goes to Mughals. With the annexation of Deccani states of Bijapur and Golconda, territorial expansion of Mughal Empire was at its zenith. Beside political unification, Mughals introduced a composite culture especially in the field of architecture and building technology. The initial phase of Mughal architecture is found at Ajmer, as Akbar after capturing Ajmer build a number of monuments of varied nature there. These structures represent the formative stage where a different architectural styles; indigenous and foreign came together and a process of synthesis was started. Hence without studying the Mughal monuments at Ajmer, the true nature cannot be discerned.

Ajmer is situated on latitude 26º27" N and longitude 74º37" E\(^1\) in the central part of Rajasthan. The town of Ajmer is located in the valley of Aravalli ranges. The strategic location of Ajmer attracted the attention of ruling dynasties and consequently has a turbulent and violent history. The city derives its name from Ajaipal, a chauhan ruler\(^2\). Ajmer remained the seat of Chauhan power till 1192 AD when Prithviraj Chauhan was defeated by Muhammad Ghauri. Thereafter Ajmer was permanently occupied by Delhi Sultanate except for small intervals when it was captured by the Rajput Rulers\(^3\). In 1558 AD Ajmer was occupied by Akbar who annexed it to the newly founded Mughal Empire. Under Akbar, it emerged as a great center of pilgrimage for all communities. Akbar soon recognized the strategic importance of Ajmer, as all the main trade routes from the north converged at Ajmer and it was considered the gateway to conquer Rajputana and Gujarat. Consequently, Ajmer was declared headquarter a subah\(^4\). Under Jahangir and Shah Jahan, Ajmer continued to enjoy the special status. Sir Thomas Roe presented his credentials to Jahangir at Ajmer\(^5\).
Besides, Dara Shikoh was born here and war of succession was won by Aurangzeb in the battle of Dorai near Ajmer in 1659. During the break-up of the Mughal Empire, the Marathas occupied the town of Ajmer. Later on in 1818 Ajmer was annexed to British Empire.

Author has undertaken four field trips to Ajmer with a purpose to survey and study the Medieval Monuments during 2004-2006. In the course of these surveys, more than fifty structures belonging to medieval period have been identified.

Presently an attempt is made to study the architecture and building technology of two Mughal monuments existing at Ajmer namely Akbari Gate of Taragarh Fort and Jahangiri Baradaris at Pushkar with the help of archaeological Tools.

**Akbari Gate of Taragarh Fort**

Taragarh Fort is situated on latitude 20°26' to 26°27' N and longitude 74°38' E, stretching from north to south and to south east. Its height from the sea level is about 870.5 mts. It was constructed on an isolated hill known as Beetli hill circled by a valley and then by a ring of mountain ranges of Aravalis in turn. Being situated on Beetli hill, it is also called as Garh Beetli. The fortification wall of the fort encompasses an area of eighty acres of hill. The width of the fortification wall varied from 4 mts to 12 mts and this variation is thickness was due to the contour and slope of the hills.

An imposing Gate providing entrance to the fort was built by Akbar in the Bastion known as Ghungat. It exists in the fortification wall of northern side (Fig. 1 & 2).
Fig. No. 1: Ground Plan of Akbar’s gate, Taragarh Fort, Ajmer
Fig. No. 2: A View of Akbar’s gate, Taragarh Fort

The gate is built in the form of gatehouse (Fig. 1). The structure is aligned on the north south axis (Fig. 1, 2 & 3). It is built on oblong plan measuring approximately 20 by 14 metres (Fig. 1). Its height from to base is about 19.5 mts. It is composed of central domed chamber providing through passage, flanking vault roof chambers on north & south and an arched vestibule on western side of central chamber in the same alignment running east to west (Fig. 1).
Western facade of Gate house consists of central arched entrance flanked by double storied alcove and then by octagonal bastion structure at both corner (Fig. 1, 4 & 5). Here the height of central arch and that of octagonal bastion type structure at both corners is equal (Fig. 2). The vertical arrangement of various architectural elements in western facade provides it a massive appearance. Vestibule containing central arch of western facade is surmounted by a small corbelled dome (Fig. 4, 6, 7 & 8).
Fig. No. 4: A closer View of Akbar’s gate, Taragarh Fort

Fig. No. 5: A View of Side alcoves, Akbar’s gate, Taragarh Fort
Fig. No. 6: A View of Vestibules, Akbar’s gate, Taragarh Fort

Fig. No. 7: A Closer View of Lower part, Akbar’s gate, Taragarh Fort
Eastern Facade has given double storey effect as it is composed of a central entrance made up of two storeys, each containing an arch (Fig. 3). Upper arch is closed while lower arch is providing full opening. The central entrance is flanked by double story alcoves (Fig. 3). Upper alcove has door opening in the room existing exactly above the flanking south & north rectangular chambers of central one (Fig. 3 & 5). Two staircases are also provided parallel to flanking rectangular chambers running from east to west and their entrance were provided from north and south side respectively on the eastern end (Fig. 1).
JAHANGIR’S BARADARI, PUSHKAR, AJMER (Fig. 9)

The Pillared Pavilions of Jahangir is located on the south side of the lake of Pushkar. Pushkar town is situated seven miles to the west of Ajmer. It is separated from the Ajmer by the Nag Pahar. Pushkar is called the king of sacred places because of the sacred lake.

Fig. No. 9: A General view, Jahangirs Baradari, Pushkar

Jahangiri Pavilions exists on a rectangular raised platform stretching from north-south axis measuring 63 mts by 21.5 mts (Fig. 9, 10 & 11). Centre of the platform was occupied by a square Baradari (Fig. 9, 10 & 12), having there openings on each side. Now its base and pillars pieces are found (Fig. 12).
Fig. No. 10: Layout plan of the Jahangir’s Baradari, Pushkar, Ajmer
On the both sides i.e. Northern side and southern side, pillared structures (Fig. 9, 10, 11, 12, 13, 14 & 15) of same type are extant. These are built of dressed red sand stone mixed with lime mortar.
Fig. No. 13: A General view, Side Pavilion, Jahangirs Baradari, Pushkar

Fig. No. 14: Another General view, Side Pavilion, Jahangirs Baradari, Pushkar
Northern side structures which runs on north-south axis, is composed of a central chamber encircled on three sides i.e. east, south and west by pillared cloisters of equal width (Fig. 10, 14, 15 & 16). Central chamber (Fig. 10 & 17) and flanking cloisters are backed by wall on north side and in the thickness of wall two staircases (Fig. 10, 11 & 13) running east to west and west to east respectively, are provided.
Fig. No. 16: A another general view of the cloister, Side Pavilion, Jahangirs Baradari, Pushkar

Fig. No. 17: A Inner view of the Central Chamber, Side Pavilion, Jahangirs Baradari, Pushkar
Central chamber has a door in the middle on northern side placed between the staircases (Fig. 9, 10, 12 & 17). This gate is in the form of projected window with two pillars (Fig. 10, 18 & 19). Entrances to these staircases are given on the platform on south side.

Fig. No. 18: A Closer view of the Pillar of the cloister, Side Pavilion, Jahangirs Baradari, Pushkar
Central chambers and surrounding cloisters are flatly roofed in trabeate style (Fig. 9, 11, 15, 16 & 17). Southern structure is the exact replica of Northern structure. It has the same dimensions (Fig. 9, 10, 11, 12 & 13). All the three structures i.e. Northern and southern structures, middle pillared pavilion are in the same alignment (Fig. 9, 10 & 11). On the eastern side of platform, there exists a graveyard
and on the western side, three sets of stairs with steps are constructed at equal distance to descend from the platform (Fig. 10). Once there existed a gate to enter to these pillared pavilions on western side but now it is no more extant.

“A Unique Wooden Śiva Temple in Varanasi: Example of Living Cultural Relations between India and Nepal”

Prof. Maruti Nandan Prasad Tiwari  
Former Emeritus Professor & Head  
Deptt. Of History of Art  
Banaras Hindu University  
Varanasi  
Email: mnpdtiwar@gmail.com

Dr. Shanti Swaroop Sinha  
History of Visual Art & Design  
Faculty of Visual Arts  
Banaras Hindu University  
Varanasi-221005

Varanasi, also known as Kāśi, is one of the oldest living cities of the world. The city with its long tradition and antiquity is also believed to be the city of salvation (Mokṣa), where Viśvanātha and Mother Gaṅgā along-with Buddha and Tīrthaṅkara Pārśvanātha bestow on the worshippers the knowledge leading to self-realization and bliss (Paramānanda). The foreign scholar like Diana L. Eck has found Varanasi as the city of ‘All India’ and ‘Good Life’ and Liberation¹. These features have attracted the people from neighboring countries of Asia (including South, South-East and East Asia) towards knowing more and more about Indian culture and art and also embracing Indian culture, thought and its religion, philosophy and art. Nepal the closest of all the neighbors was hence greatly privileged to have enjoyed the sharing of Hindu and Buddhist Culture, religion and artistic legacy of India at least from 5th-6th century CE².

The Pashupatinath temple is located between Dashashvamedha ghat and Manikarnika ghat, on the northern bank of river Ganges at the apex of the river band around which city is inhabited (Fig. 1-2). It is located at Lalita ghat. This temple exists at a distance of 255 meters east from Kashi Vishwanatha
temple, over-looking river Ganges (Fig. 3). Adjacent to the shrine on south-west corner, there exists a Dharmashala of the same antiquity (Fig. 4).

Fig. No. 1: Satellite Map of city of Varanasi

Fig. No. 2: Satellite Map of Ghats from Dashashvamedha to Manikarnika
Fig. No. 3: Satellite Map of Pashupatinath temple and Dharmshala

Fig. No. 4: Top view of Pashupatinath temple and Dharmshala, Lalitaghat, Varanasi
The Nepalese shrines without inner circumambulation merely have sanctum-sanctorum (garbhagriha) and are mostly of nirandhāra type. The Paśupatinātha temple at Kathmandu is shrine of the sarvatobhadra type, with a door on each side offering a view of one of the four faces of the sarvatobhadra Paśupati-liṅga. The Paśupatinātha temple at Kathmandu is exceptionally a sāndhāra prāsāda, though the passage enclosed by the wall in circumambulatory on the western side is not accessible to any except the ordained priests and temple attendants of approved categories.

The cultural diversity with innate unity of Indian culture can be experienced best on the ghāṭs (stepped river front of the Gaṅgā) of Varanasi. One of these ghāṭs is the Lalitā-Ghāṭ where a unique wooden Nepali temple of 1843 CE (near Goenkā Library, D 1/67) stands as living example of the intimate cultural relations of India and Nepal (Fig. 5-6).
The temple known as Samarājeśvara Mahādeva or Nepāli temple is dedicated to Śiva, the Indian god of dissolution (Vilaya or Saṁhāra) worshipped as Mahādeva and Maheśvara (Supreme god). The sanctum has beautifully carved Śiva-liṅga in Narmada stone. This temple is in Pagoda style of temple architecture, which was very much popular in Nepal. The best example of this style is the Paśupatinātha temple of Kathmandu (Nepal). The Paśupatinātha temple, a world heritage site of 1697 CE was not only built in Pagoda style but it does reveal ample use and excellent workmanship of wood in its architectural and sculptural carvings, besides use of clay bricks. Interestingly and importantly, the Paśupatinātha temple, dedicated to Shiva, was earlier than the Samarājeśvara wooden temple of Varanasi and hence its distinct bearing on architecture and sculpture of latter is apparent. It is nirndhāra type of temple.
The Nepalese people considered themselves as part of the Indian sub-continent culturally, a fact indicated by repeated reference to Nepal being a part of the Bhārata-khaṇḍa in the Jambūdvīpa in the following tell-tale manner: Śvetavarāhakalpe vaivasvate manvantare adya śrīkliyuge jambūdvīpa bhāratakhaṇḍe subhāratavarse Himavatpāde Vasukishtre Śrī Nepāladeśe Paśupatisannidhāne, etc. One of the earliest inscriptions to refer to this is the copper plate inscription affixed to the Kaśṭhamaṇḍapa at Kathmandu and dated to Nepal Saṁvat 605 (CE 1484)³.

The profound use of wood in both the temples and the presence of Śiva-liṅga in the sanctum-sanctorum (garbhagriha) along with the figures of Śakti (Mahiṣamardinī) and Gaṇeśa, on two sides of inner walls of the garbhagriha are all indicative of their commonality and mutuality. The Nepali temple of Varanasi has peculiar architectural and sculptural embellishments mainly in wood. The temple is built of both the brick and wood with very little use of stone, but its uniqueness is in three storyed wooden pagoda, cornice and supporting wooden bars (struts). Its most brilliantly and exquisitely carved wooden doors have numerous motifs, designs, symbols and above all the figures of Brahmanical divinities including even Buddha. The temple carvings speak of the master wood carvers working at the temple (seemingly from Nepal) and who were having broad based vision of cultural tradition of India. The Samarājeśvara Mahādeva temple of Varanasi seems to be small and modified model of Paśupatinātha temple of Kathmandu (Nepal). Both the temples are square in plan and have entrance from all the sides as per Sarvatobhadra plan of temple.

The wooden temple of Varanasi was built during the reign of King Rajendra Vikram Shah and Prince Surendra Vikram Shah in 1843 CE. At present this temple is under the authority of Gothi committee. Adjacent to the temple is Nepali Dharmaśālā having beautifully done traceries and other artistic expression in wood and bricks. The wooden sculptures are carved all over the temple. Some important sculptures in the sanctum are however carved in stone and they also reveal the artistic excellence. Though the top of the temple and other ruined parts have been treated and restored, yet it requires complete and proper restoration and preservation because of its uniqueness as living example of harmonious relationship of two neighbouring countries in past as also of fusion of Indian and Nepali art and architecture. The work should be taken up jointly with the help of Archaeological Survey of India, New Delhi and Nepal Government.

The temple facing south is built on the square stone base⁴ (Fig. 7). The other facades are similar (Fig. 8-10). On the eastern and northern sides exist buildings at a very close distance therefore photographs cannot be taken. It has four entrances (Fig. 11) which has been the traditional plan of sarvatobhadra temples having four entrances on four sides to symbolize the welfare of all and being auspicious on all the sides. The origin of Sarvatobhadra temple could be seen in the earlier sculptures (Jina-Caumukhi or Sarvatobhadra-Pratimā) and symbols like Svastik, Buddhist stupas and their four
toranā gates and also of Lion pillar (showing four lions sitting back to back) of Ashok at Sarnath. The reference to such temple type is found in the treatise of Indian architecture Aparājitapricchā (of Bhuvanadeva) datable to early 13th century CE.

Fig. No. 7: Southern (front) façade
Fig. No. 8: Western façade
Fig. No. 9: Second storey of Northern (rear) façade

Fig. No. 10: Second storey of Eastern facade
As we enter the temple from the southern side gate, on both sides of the staircase leading to the platform of the temple exist images of *Bhairava* and *Shiva* fixed inside niche like structures (Fig. 12-13).
Fig. No. 12: Bhairava
Of the three storeys of the śikhara (of pagoda style), two storeys are empty and only the ground one enshrines in the sanctum beautifully carved stone Śiva-liṅga showing entwining serpents. The Tritala or three storeys are symbolically suggestive of the concept of Tri or Trio (tri) found so profusely in all the Indian cultural and religious steams. In Vaidik-Purāṇik tradition it stands for Sat,
Raja and Tama or even Triloka or Trideva- Brahmā, Viṣṇu and Śiva of Brahmanical trinity. In Buddhist and Jaina traditions we have concept of Tri-ratna, respectively as Buddha, Dharma, Sangh and Samyak Darshan, Samyak Jnana and Samyak Caritra. The Śiva-liṅga of Narmadā stone carved with great care and skill suggests the deep devotion of the artist towards Śiva (Fig. 14).

Fig. No. 14: Śiva-liṅga
On the inner-wall of the sanctum, the stone sculpture of 18-armed Dūrgā-Mahiṣamardini can be seen (Fig. 15). The figure is dynamic and forceful and represents the goddess in the act of killing the demon Mahiṣāsura with different weapons, especially trident (triśula).

Fig. No. 15: Image of Dūrgā-Mahiṣamardini
Another important figure on the inner-wall of sanctum is elephant-headed Gaṇeśa, who in Indian tradition is conceived as the god of Siddhi (success), Buddhi and Riddhi (prosperity) (Fig. 16).

Fig. No. 16: Image of Ganesh
However niches on other two sides are vacant yet in the spirit of Varanasi temples, we may safely presume that those figures must have been of Viṣṇu and Sūrya to suggest tradition of *Pancadeva-pūjan* (Fig. 17-18).
Fig. No. 18: Sūrya
The fierce forms of Śakti and Śiva are numerous which are indicative of the fact that the temple was built under the Tantric influence and worship. The erotic figures with the male and female couples engaged in sexual intercourse (including mukha-maithuna), were carved mainly on the outer wooden roof and on struts, are also suggestive of Tantric bearing. The erotic sculptures full of romantic and sensual background remind us of the ancient and important temple sites of India namely – Khajuraho (M.P., 10th-12th century CE), Modhera (Sun temple, Gujarat, 1026 CE) and Konark (Sun temple, Orissa, 13th century CE). The older carvings have been replaced by new ones and the older wooden panels have been stored behind the temple. The figural depictions of Samarājeśvara Nepali temple are in the tradition of Indian art. In Indian art, there has been tradition of carving Brahmā, Viṣṇu and other gods and goddesses, besides Śakti, Gaṇeṣa and Kārttikeya, in the Śiva temples, which are found in the Samarājeśvara Nepali temple also.

The four entrances on four sides of Mahāmanḍapa are of Caturaśākhā type having for parallel vertical rows and showing the decoration respectively of leaves, kapota, human figures and creepers (Fig. 19-22).

Fig. No. 19: The three gates of front (southern) façade, first floor
Fig. No. 20: Main Gate, Southern facade
Fig. No. 21: Left flanking gate, southern facade
Fig. No. 22: Right flanking gate, southern façade
However on the main entrance of south, it is flower combined with conch. The figures in the centre of door-lintel (Lalāta-bimba) on all the four sides are of four-armed Śiva as temple is dedicated to Śiva. These figures show Śiva with trident, snakes with ḍamaru.

The western and east door-ways (Fig. 23-28) in its door-lintel contain the figures of ten incarnatory forms of Viṣṇu to suggest the core concept of Indian art and culture, wherein even on Śiva temple besides different forms of Śiva, the figures of Viṣṇu and his incarnatory forms, Śakti, Surya and Gaṇeśa are represented. The same spirit of religious harmony we find in the present Nepali Shiva temple. The incarnatory forms of Viṣṇu on door-lintel show the following forms – Matsya, Kurma, Varāha, Nṛsiṁha, Vāmana, Parāśūrāma, Rāma, Balarāma, Buddha and Kalki. In Matsyāvatāra, the lower half is of fish, while upper half is of human being, holding disc, lotus and mace in three hands. In Kurmāvatāra also it is composite figure of tortoise and human form. The four hands carry all the attributes of Vishnu namely – lotus (Padma), disc (Cakra), mace (Gadā) and conch (Saṅkha). The Varāha form is shown as Nṛvarāha with boar face showing in his four hands as usual lotus, disc, conch and mace. The folded left hand holding conch shows Bhūdevī sitting on elbow. As per Puranas Bhudevi is being released from the grip of demon Hiranyaksha by Varāha-Viṣṇu. The next is Nṛsiṁha shown as Kevala-Nṛsiṁha without the figure of Hiranyakaśipu. Nṛsiṁha shows in his three surviving hands respectively Varada-mudrā, Cakra and Gadā. Paraśūrāma terrific in appearance is two-armed and holds Paraśu and Pāśa. Next comes Daśarathi Rāma holding bow and arrow in two hands. Balarāma as usual is shown with plough and pestle to suggest that he has been the god of agriculture. The ninth figure is serene-faced, two-armed Buddha, holding fly-whisk and Bhikṣā-pātra, which is certainly unusual because Budhha is shown either in sitting-posture or standing with Abhaya or Varada-mudrā. Apparently the artist here represents Buddha as Bhikṣu. Last figure is of Kalki (the future incarnation of Viṣṇu), in which he rides on a horse and holds its rein, while other hand bears a sword.

Fig. No. 28: Right flanking gate, eastern façade
Northern and southern facades are similar in design and decorations (Fig. 29-31). The only difference on northern and southern side is that the main door lintel is carved with deities sitting on the ground on northern side & sitting on animal vehicles on the southern sides.
Fig. No. 30: Left flanking gate, northern façade
Fig. No. 31: Right flanking gate, northern façade
On both the ends of all the four door-ways in total eight figures of Sūrya standing on a chariot drawn by seven horses could be seen, in which two-armed Sūrya holds long stalked lotuses (Fig. 32-39). The figures holding bow, arrow, sword, lotus, battle-axe and rosary are shown on all doorways. The horse, swan, bull, lion and elephants like mounts are shown with them.

The rendering of Śiva in different forms is found on this temple. A number of such figures are shown wherein Śiva is shown sitting on the back of Nandi and holding the attributes like trident, ḍamaru and kamaṇḍalu. Śiva in all the forms are shown with third eye (trinetra) and having fierce form with the ornaments like necklace, armlet which is all made of snakes so usual with Śiva. The snakes were associated with Śiva but at the same time they also suggest the popularity of Nāga-Pūjā (snake worship) in Varanasi.

It is equally interesting to note the presence of Aṣṭamātrikās but with Śaivite character. These figures invariably hold trident. These Śaivite-Mātrikās like Vaiṣṇavī, Vārāhī, Cāmuṇḍā, Brahmāṇī, Māheśvari, Kaumāri and Indrāńī are shown on the wooden doors on all the sides. These Mātrikās, besides trident, hold the traditional attributes associated with each of them such as cakra with Vaiṣṇavī, vajra with Indrāńī, sula with Kaumāri and trident, skull and snake with Śivā. Surprisingly these Mātrikās are benign in appearance but below them are shown fierce and dynamic forms of the selfsame Mātrikās represented as fighting with the demons. The weapons like skull and snake-garland (kapāla evam nāga-mālā) in their hands are all suggestive of the fierce form. These Mātrikās have also been provided with the traditional vāhanas (mount) such as garuḍa for Vaiṣṇavī, mahīsa for Vārāhī, corpse (piśāca) for Cāmuṇḍā, swan for Brahmāṇī, bull for Māheśvari, peacock for Kaumāri and elephant for Indrāńī. Thus the Nepali temple becomes an important example of Śiva-Śakti worship wherein both are worshipped in the pacific and malefic forms, the two main aspects of human and divine activity.

On the main southern door-way, above the door-lintel showing incarnatory forms of Viṣṇu, is a beautiful wooden makara-torana (like Chaitya-gavākṣa) with triple chatra topped by kalaśa. Below is big garuḍa figure in human form flanked by Nāga-devis with snake canopy and also two small figures of Buddha (Fig. 40). Further below are framed standing figures of four-armed Brahmā, Śiva (in centre) and Viṣṇu. Brhamā with visible three faces is shown with haṅsa-vāhana and manuscript and rosary in hands. Next as lalāṭa-bimba is the figure of Śiva with jaṭā-jūta. Here Śiva is in the centre because the temple is dedicated to Śiva. Śiva is provided with two bull mounts, while he holds triśula and ḍamaru along with other attributes. In the last, Viṣṇu stands on garuḍa shown in human form. He is carrying disc, conch and mace. These three figures on southern door-way along with the total figural and decorative motifs are best wooden representations of Nepali temple.
The most dynamic is the eighteen-armed stone sculpture of Mahiṣamardini on the north inside wall of the sanctum, which symbolizes the victory of truth over the evil (Fig. 15). The image is a complex figure so far as iconography is concerned. She is killing Mahiṣāsura with trident being pierced into the body of the demon. The figure is based on the description available in the Devī Māhātmya, which says that the human form of the demon fighting with the goddess came out of the beheaded neck of the demon shown as buffalo. The goddess holds trident, arrow, cakra, dagger, khaṭvāṅga, shield, mace, and bow like dreaded weapons in her hands to present the goddess as Supreme goddess of power (Shakti). The figure rightly qualifies the statement of Devī Māhātmya – “Yā Devī Sarvabhūteśu Śakti Rūpeṇa Saṃsthitā”.

Indian Journal Of Archaeology, Vol. 4, No. 4, (2020), 1203-1271 / Prof. Maruti Nandan Prasad Tiwari & Dr. Shanti Swaroop Sinha
Another interesting image of sanctum is that of Gaṇeśa, who has been provided with two tusks and two mūṣaka (Rat)-vāhana, which are rare features of present Gaṇeśa image. Gaṇeśa holds conventional attributes like lotus, battle-axe and modakas (sweet balls) in hands (Fig. 16).

As the temple is dedicated to Śiva, most of the forms in wood carvings obviously are of Śiva, mainly shown in frightful appearance such as Bhairava shown with dog mount. The other forms of Śiva include mainly Umā-Maheśvara shown respectively on lion and bull. Surprisingly the composite figure of Śiva and Śakti as Ardhanārīśvara is conspicuous by its absence, although different independent forms of Shiva and Śakti are present.

The eves exists on all four facades at the roof level of the first floor are supported by long struts resting at the level of first floor. Three struts are fixed in the corners and two struts are fixed in the middle which support the tiled roof of the eves. All the struts are carved with different deities and some of them have erotic scenes also. First floor has a window covered with wooden carvings. The southern sides shows the face of Shiva in the middle of the window and the other three sides have lattices only in the window (Fig. 43-52).

There are metallic flags hanging from the corners of first floor eves. All the metallic flags have Shiva and Parvati images (Fig. 53-55).

Fig. No. 53: Metallic flag hanging from South-west corner
Fig. No. 54: Metallic flag hanging from South-east corner
The second storey on all four sides has gabled roof projecting beyond walls and supported by three struts in the corners. It has a false wooden window having lattice for passage of air. The struts are carved with figures of divinities and human figures. Some of the figures are erotic. The corner struts show jumping lions standing on a kneeling woman. Bells are hanging from the roof as seen from the front. The first floor is empty (Fig. 56-62).

Fig. No. 61: Second storey on eastern side façade

Fig. No. 62: Strut on second storey on eastern facade
Shikhara of the temple is in the form of inverted lotus supporting a lotus flower, water vessel, bijapuraka topped by a trichhatra supported by four metallic legs (Fig. 63). Similar smaller shikharas exists at the four corner of the base on which the large shikhara is resting. The base of shikhara has many moldings including a prominent Karnika in the middle. The corners are raised like gabled roof.

This temple is important also for the rendering of symbols and motifs of ancient Indian heritage namely, Svastika, Dhvaja, Nandyavarta, Kalaśa, Padma. The abundance of the stylized figures of makara (looking like winged and as having elephant like trunk) might have been suggestive of the situation of the temple on the bank of river Gaṅgā who has rides makara-vāhana. The other suggestion could be in the light of erotic figures profusely shown mainly on the wooden supporting bars (struts) of the balconies, that the makara is related to Kāmadeva also.

One interesting observation to be noted is that the Śiva figures including Bhairava are all suggestive of the Tantric influence, showing Śiva with three eyes and snakes (as ornaments and as attributes) and frightful appearance. Perhaps because of this Tantrik impact, the benign and pacific
forms of Śiva like – Kalyāṇasundara, Gaṅgādhara, Dakṣiṇāmūrti, Ravaṇānugraha, Arjunānugraha are not shown. Also the terrific (Sanghāra) forms like – Añdhakāri, Gajāntaka, Tripurāṇtaka did not find representation on this important Śiva temple.

Thus this unique Nepali temple dedicated to Śiva is not only an excellent example of wood carving in respect of both architecture and sculpture but it does also reveal the fusion of the forms and features of Indian and Nepali traditions. The physical features and ornaments show the features of Nepali art while the concept, content and iconography, in spirit and manifestation, are exclusively Indian. Therefore the temple undoubtedly, as the living example of harmonious relationship of India and Nepal in past, inspires us to live even today in harmony and with mindset of amicable sharing.

A two storeyed Dharmshala exists on the south-western side of the temple (Fig. 64-70). It has a verandah opening towards eastern side in front of the temple. This verandah was probably used by visitors. It’s an oblong closed structure having a square courtyard in the middle and access to this is provided by a door on northern side. The door opening in the verandah are closed at present. The eastern façade reveals a verandah having four pillars flanked by two windows provided in the corner cells. First floor has a verandah covered by woodwork. This woodwork has three windows. The central one has leaves and the side ones are closed by lattice. The second floor is also similar. The gabled roofs are covered by tiles.
